## Is our engineering education system suitable to fulfill the needs of the wireless industry?

---

*L. Besser. "Is our engineering education system suitable to fulfill the needs of the wireless industry?." 1998 MTT-S International Microwave Symposium Digest 98.2 (1998 Vol. II [MWSYM]): 543-546.*

To survive in the globally competitive marketplace, the traditional "microwave engineer" of the past decades has gradually transformed to a "wireless RF engineer." Industry expectations for this new breed are quite different from its predecessor, therefore our universities must develop new programs to prepare young engineers for their careers.
