A 9.2 GHz microwave applicator for the treatment of menorrhagia

I.B. Feldberg and N.J. Cronin. "A 9.2 GHz microwave applicator for the treatment of menorrhagia." 1998 MTT-S International Microwave Symposium Digest 98.2 (1998 Vol. II [MWSYM]): 755-758.

We report on the design, analysis and clinical use of a 9.2 GHz medical applicator specifically developed for the purpose of endometrial ablation in the treatment of menorrhagia. The technique of endometrial ablation is introduced. Experimental and clinical trials are summarised.
