A full-wave system simulation of a folded-slot spatial power combining amplifier array

M.N. Abdulla, U.A. Mughal, Huan-Shang Tsai, M.B. Steer and R.A. York. "A full-wave system simulation of a folded-slot spatial power combining amplifier array." 1999 MTT-S International Microwave Symposium Digest 99.2 (1999 Vol. II [MWSYM]): 559-562 vol.2.

An integrated electromagnetic and circuit modeling environment is developed for a CPW-based spatial power combining array with folded slot antennas. The simulation and measurements of the effective isotropic power gain (EIPG) of an individual cell and of a 4/spl times/4 array is presented.
