## New generation of endocavitory applicators for microwave thermotherapy in urology

---

A. Dietsch, J.C. Camart, M. Chive and J. Pribetich. "New generation of endocavitory applicators for microwave thermotherapy in urology." 1999 MTT-S International Microwave Symposium Digest 99.2 (1999 Vol. II [MWSYM]): 603-606 vol.2.

An increased interest for thermotherapy using microwaves has been observed in the last decade. This paper describes a new generation of applicators designed for endocavitory thermotherapy. The possibility of improving the efficiency of the previous applicators is clearly focused by the theoretical results which are presented and verified by experimental measurements.
