
THE 1963 PTGMTT SYMPOSIUM DIGEST:

The PTGMTT SYMPOSIUM DIGEST serves as a convenient, timely record of the disclosures of the most recent advances in the microwave art at the 1963 PTGMTT NATIONAL SYMPOSIUM.

A PTGMTT SYMPOSIUM DIGEST is not published under ideal circumstances. It must be compiled and printed in a matter of only weeks before the SYMPOSIUM. If the cost is too great, its financial burden can cripple the SYMPOSIUM.

Accordingly, several innovations have been instituted in this volume. The considerable cost of the 1963 PTGMTT SYMPOSIUM DIGEST has been largely absorbed by the Institutional Listings in this DIGEST, representing contributions by fifty-eight companies in the Microwave Industry. Each author has provided his typed copy in a pre-determined format for direct reproduction. Also, a large number of NOTE pages are supplied, and the resultant volume is in book size.

It is hoped that this 1963 PTGMTT SYMPOSIUM DIGEST will serve as the above record, and provide a reminder of memorable scientific experience.

C. Louis Cuccia, Chairman, Digest Committee
1963 PTGMTT NATIONAL SYMPOSIUM

GENERAL INFORMATION

TRG, Incorporated
Syosset, L.I.
Antenna and Microwave Divisions
East Boston, Mass., Menlo Park, Calif.

Millimeter components, microwave antennas and feeds, VLF thru
HF antennas, Quantum electronics
