

G-MTT SYMPOSIUM DIGESTS

The *IEEE-G-MTT Symposium Digest* presents a brief technical synopsis, including the more important figures, of all the technical papers given. While many of the papers will be published more comprehensively in a later issue of the IEEE TRANSACTIONS ON MICROWAVE THEORY AND TECHNIQUES, most are not. The Digest offers the quickest publication of the state of the art material given at the Symposium. For your convenience the catalog numbers and prices of former symposium digests are also listed below.
