

## Editor's Note

**B**EGINNING with the February 1975 issue, Dr. Don Parker is the Editor of the IEEE TRANSACTIONS ON MICROWAVE THEORY AND TECHNIQUES. Dr. Parker is well known to the MTT community through his technical contributions, his long-standing involvement with MTT Symposia, and as a member of AdCom. I heartily welcome him to his new post and wish him well, knowing that the TRANSACTIONS is in good hands.

These pages are the product of the volunteer efforts of the authors, the Editor, the Associate Editors, and the Review Board. In a typical year more than 1000 individual reviews of submitted works are made. I am most grateful to the many reviewers, both those named on the cover and those who have toiled without benefit of public notice.

The IEEE Editorial Staff at Headquarters has my re-

spect for its fine professional production efforts. I particularly want to thank Senior Editor Nancy Budde, and Gail Ferenc before her, for indulging the Editor's many demands on them. Many thanks are also due to Ms. Kathy Bauer and her predecessor Ms. Debi Hertert, my editorial assistants, who processed and kept track of the more than 700 manuscripts received at Washington University. Finally, the support and guidance I received from the MTT AdCom made it possible for us to maintain the quality of this TRANSACTIONS during trying financial circumstances.

I am grateful for having had the opportunity to serve the MTT community and am proud, and relieved, to join the ranks of the Past Editors.

FRED J. ROSENBAUM
