

PANEL DISCUSSION:

MICROWAVE TECHNOLOGY IN THE DEPARTMENT OF DEFENSE

Session Organizers: Dr. Leo Young, NRL & ODDR&E  
Dr. Fred Sterzer, RCA

Session Chairman: Leonard R. Weisberg  
Assistant Director  
Electronics & Physical Sciences  
ODDR&E

Panelists: K. Fisher, ECOM  
Dr. H. Gerlach, HDL  
N. Lipetz, ECOM  
E. Maynard, NELC  
Dr. C. Sletten, AFCRL  
Dr. L. Strom, DARPA  
Dr. L. R. Whicker, NRL  
Dr. W. Eppers, AFAL

Each panelist will address the following questions:

A. Facts

1. What are the major thrusts in your laboratory or technical area?
2. What were the major achievements during the past year?
3. What will be the major changes in emphasis during the next year?

B. Views

4. What are the two or three greatest needs (caused by existing deficiencies)?
5. What are the two or three greatest opportunities (brought about by technological advances that should be exploited)?
6. What should our investment strategy be in view of these needs and opportunities? (Which alternative approach looks best?)

The panel discussion will be followed by questions from the floor and a general discussion.
