CALL FOR PAPERS

The First Annual Microwave and Millimeter-Wave Monolithic Circuits Symposium will be held in Dallas, Texas, at the Hyatt Regency Hotel on June 18, 1982. This symposium will be held annually in conjunction with the IEEE MTT-S International Microwave Symposium.

Papers are solicited describing original work in the field of microwaves and millimeter-waves where technology is employed to process circuits and devices on semiconductor substrates with current or potential applicability to the 1 – 300 GHz frequency range. The following subject areas concerned with microwave and millimeter-wave monolithic technology are particularly appropriate for this conference:

- Analog
- Digital
- Materials
- Devices
- Circuits
- Components
- Systems and Subsystems
- Interface Problems
- Power Generation
- Signal Reception
- Modulation
- Active and Passive
- Computer-Aided Techniques
- Theory and Analysis
- Reliability
- Testing and Characterization

Tutorial and review papers on the subject fields are also solicited.

Authors are requested to submit one-page abstracts clearly explaining their contribution, originality, and importance. Five (5) copies of the abstract must be received on or before 15 January 1982 by:

M. Yoder
 ONR-414
 Arlington, VA 22217
 [Tel: (202) 696-4218]

Notice of acceptance or rejection will be mailed to authors by 1 March 1982. Authors of accepted papers will receive material and instructions for preparing photo-ready copies of papers to be printed in the Symposium Digest, copyright release forms, and presentation guidelines. The authors are also encouraged to prepare expanded versions of the accepted papers for publication in an issue of the MTT-S and/or ED-S Transactions.
