

Contents

TUESDAY, MAY 31

Session I. Signal Processing

Chairman: C. Chao, *Honeywell Corporate Technology Center, Bloomington, MN*

High Quality X-Band Monolithic Diode Mixer, A. W. Jacomb-Hood, J. R. Smith, and L. G. Hipwood, *GEC Research Laboratories, Wembley, ENGLAND*

Wideband GaAs Four Quadrant Multiplier, C. Ryan, D. Hartman, J. M. Frary, and C. E. Weitzel, *Motorola, Inc., Phoenix, AZ* 5

A GaAs High-Speed Counter Using Current Mode Logic, K. Suyama, H. Suzuki, Y. Nemoto, S. Yamamura, and M. Fukuta, *Fujitsu Ltd., Kawasaki, JAPAN* 12

Session II. Devices and Processing

Chairman: R. A. Murphy, *MIT Lincoln Laboratory, Lexington, MA*

A GaAs/GaAs Heterojunction Ballistic Bipolar Transistors (BBT) for EHF Amplifiers, E. J. Zhu, W. H. Ku, and C. E. C. Wood, *Cornell University, Ithaca, NY* 17

Profile Studies of Ion-Implanted MESFETs, J. M. Golio and R. J. Trew, *North Carolina State University, Raleigh, NC* 22

Low Noise MESFETs for Ion Implanted GaAs MMICs, A. K. Gupta, D. P. Siu, K. T. Ip, and W. C. Peterson, *Rockwell International, Thousand Oaks, CA* 27

Transient Capless Annealing of Ion Implanted PBN LEC GaAs for Monolithic Microwave Integrated Circuits, R. C. Clarke, G. W. Eldrige, S. K. Wang, and W. F. Valek, *Westinghouse R&D Center, Pittsburgh, PA* 31

A New Via Hole Structure for Power GaAs MESFETs and MMIC, Li Songfa and Liu Qingxiang, *Hebei Semiconductor Research Inst., Shijiazhuang, China* 36

Session III. Millimeter-Wave Circuits

Chairman: Barry Spielman, *NRL, Washington, DC*

A Two-Stage Monolithic Buffer Amplifier for 20 GHz Satellite Communication, W. C. Peterson and A. K. Gupta, *Rockwell International, Thousand Oaks, CA* 37

A GaAs Monolithic Phase Shifter for 30 GHz Application, V. Sokolov, P. Bauhahn, J. Geddes, T. Contolatis, and C. Chao, *Honeywell Corporate Technology Center, Bloomington, MN* 40

Monolithic Frequency Doublers, A. Chu, W. E. Courtney, L. J. Mahoney, R. A. Murphy, and R. W. McLelland, *MIT Lincoln Laboratory, Lexington, MA* 45

94 GHz Monolithic GaAs Balanced Mixers, C. Chao, A. Contolatis, S. Jamison, and C. Butter, *Honeywell Corporate Technology Center, Bloomington, MN* 50

Session IV. Power Amplifiers

Chairman: R. Gilson, *U. S. Army, Ft. Monmouth, NJ*

A New, Specifically Monolithic Approach to Microwave Power Amplifiers, D. Pavlidis, Y. Archambault, M. Efthimerou, D. Kaminsky, A. Bert, and J. Magarshack, *Thomson-CSF/DCM, Orsay, FRANCE* 54

Monolithic Broadband Power Amplifier at X-band, A. Platzker, M. S. Durschlag, and J. Vorhaus, *Raytheon, Lexington, MA* 59

Wideband 3 W Amplifier Employing Cluster Matching, R. G. Freitag, J. E. Degenford, D. C. Boire, M. C. Driver, R. A. Wickstrom, and C. D. Chang, *Westinghouse, Baltimore, MD* 62

2-20 GHz Traveling-Wave Power Amplifier, Y. Ayasli, L. D. Reynolds, R. Mozzi, J. L. Vorhaus, and L. Hanes,
Raytheon, Lexington, MA

67

WEDNESDAY, JUNE 1

Session V. Monolithic Amplifiers

Chairman: R. Decker, Lehigh University, Lehigh, PA

Broadband Monolithic Low Noise Feedback Amplifiers, P. N. Rigby, J. R. Suffolk, and R. S. Pengelly, *Plessey, Research Ltd., Caswell, ENGLAND*

71

2-6 GHz Monolithic Microwave Amplifier, W. O. Camp, Jr., S. Tiwari, and D. Parsons, *IBM, Osego, NY*

76

Wideband, High Gain, Small Size Monolithic GaAs FET Amplifiers, W. Pauker and M. Binet, *Laboratoire d'Electronique et de Physique Appliquee, FRANCE*

81

12 GHz-Band Low-Noise GaAs Monolithic Amplifiers, H. Itoh, T. Sugiura, T. Tsuji, K. Honjo, and Y. Takayama, *Nippon Electric Co., Ltd., Kanagawa, JAPAN*

85

GaAs Monolithic MICs for Direct Broadcast Satellite Receivers, S. Hori, K. Kamei, K. Shibata, M. Tatematsu, K. Mishima, and S. Okano, *Toshiba Corp., Kawasaki, JAPAN*

90

Miniaturisation of a band-X Monolithic GaAs Amplifier, P. Dueme, M. Le Brun, P. R. Jay, and C. Rumelhard, *Thomson-CSF, Orsay, FRANCE*

96

GaAs Monolithic Lumped Element Multistage Microwave Amplifier, K. P. Weller, G. D. Robinson, A. Benavides, and R. D. Fairman, *TRW, Redondo Beach, CA*

100
