

Our IEEE periodicals have only one competitor as an information source in electrotechnology.

Electrooptics . . . image processing . . . very large-scale integration . . . the microprocessor. With new electrical/electronics engineering breakthroughs on all fronts, keeping up to date is a formidable task for today's engineer.

Our 35 IEEE technically specialized Societies and Councils—and many of our geographical entities—help meet this problem head-on by regularly sponsoring local, regional, national, and international conferences where the state of the art in a special subject is covered in depth by experts from industry, government and academe.

In printed and microfiche editions. Of the literally hundreds of such meetings yearly, we classify some 100 as "major", and generate a printed Conference Record or Digest of the proceedings. Each publication is also available in a space-saving microfiche edition—at a 50% discount when purchased along with the printed edition.

Our IEEE conference publications provide vital, first-hand information in a subject range as diverse as the names of our Societies and Councils.

From Acoustics to Vehicular Technology.

For example: *International Solid-State Circuits Conference* . . . *National Aerospace & Electronics Conference* . . . *International Communications Conference* . . . *Oceans* . . . *International Electron Devices Meeting* . . . *COMPCON (Spring and Fall)* . . . *Annual Conference on Engineering in Medicine & Biology* . . .

In combination, our conference records and our massive periodicals program comprise the world's foremost source of original publishing in the burgeoning field of electrotechnology.

Special library purchase plans. IEEE's Open Order Plan (OOP) permits libraries to place an advance order to

IEEE conference records

receive and be billed for every conference record as published, or only those titles falling within any of seven subject sub-groupings. And now libraries may enter a yearly subscription and receive *all* records (about 105) at a worthwhile saving. Normally paper-bound, conference publications are specially clothbound for both subscribers and OOP customers.

Send for free catalog

If your library serves engineers or scientists involved in adapting electrical/electronics engineering knowledge to problem-solving, then you should become familiar with the full extent of IEEE's resources. They are immense.

To obtain copies of our latest conference record listing, plus details on

our subscription offer and the IEEE Open Order Plan, call IEEE ("I-Triple-E") Conference services: (212) 705-7596. Or mail the coupon below.

Serving over 230,000 members and 14,000 libraries worldwide.
