TUESDAY, MAY 29

Session I. Microwave Control Circuits

Chairman: Russ Gilson, *ERADCOM, Ft. Monmouth, NJ*

- A Microwave Phase and Gain Controller With Segmented-Dual-Gate MESFETs in GaAs MMIC**, Y. Hwang, Y. Chen, and R. Naster, *General Electric, Syracuse, NY*; and D. Temme, *MIT Lincoln Laboratory, Lexington, MA* 1
- An Analog X-Band Phase Shifter**, D. Dawson, A. Conti, S. Lee, G. Shade, and L. Dickens, *Westinghouse Electric, Baltimore, MD* 6
- Wideband S-C Band Monolithic Phase Shifter**, Y. Ayasli, S. Miller, R. Mozzi, and L. Hanes, *Raytheon Research, Lexington, MA* 11

Session II. Signal Processing

Chairman: P. Greiling, *Hughes Research Labs, Malibu, CA*

- Monolithic Gallium Arsenide I-Q Demodulator**, V. O'Neill II and C. Ryan, *Motorola, Gilbert, AZ*; and C. Weitzel, *Motorola, Phoenix, AZ* 14
- GaAs Monolith MIC Mixer-IF Amplifiers for Direct Broadcast Satellite Receivers**, S. Watanabe, J. Ozaki, M. Miyauchi, M. Tatematsu, S. Hori, and K. Kamei, *Toshiba, Kawasaki, JAPAN* 19
- Si-Monolithic Microwave Prescaler IC**, S. Watanabe, S. Shinozaki, N. Kusama, S. Miyazaki, and T. Nakata, *NEC, Yokohama, JAPAN* 24
- On-Chip Pulse Transmission in Very High Speed LSI/VLSIs**, H. Hasegawa and S. Seki, *Hokkaido University, Sapporo, JAPAN* 29

Session III. Amplifiers and Oscillators

Co-Chairmen: Y. Ayasli, *Raytheon Co., Lexington, MA*

H. J. Kuno, *Hughes Aircraft Co., Torrance Research Center, Torrance, CA*

- Transformer Coupled High Density Circuit Technique for MMIC**, D. Ferguson, J. Keuper, R. Lokken, and J. Culp, *Honeywell, Minneapolis, MN*; and P. Bauhahn, C. Chao, and A. Podell, *Honeywell, Bloomington, MN* 34
- A Manufacturable GaAs MMIC Amplifier with 10 GHz Bandwidth**, S. Moghe, T. Andrade, H. Sun, and C. Hwang, *Avantek, Santa Clara, CA* 37
- A Miniature 2–18 GHz Monolithic GaAs Distributed Amplifier**, W. Kenna, T. Andrade, and C. Hwang, *Avantek, Santa Clara, CA* 41
- A Monolithic Multi-Stage 6–18 GHz Feedback Amplifier**, A. M. Pavio, S. D. McCarter, and P. Saunier, *Texas Instruments, Inc., Dallas, TX* 45
- An 8–18 GHz Monolithic Two-Stage Low Noise Amplifier**, L. C. Liu, D. W. Maki, C. Storment, N. Sokolich, and W. E. Klatskin, *Hughes Aircraft Co., Torrance Research Center, Torrance, CA* 49
- Capacitively Coupled Traveling-Wave Power Amplifier**, Y. Ayasli, S. W. Miller, R. Mozzi, and L. Hanes, *Raytheon Co., Lexington, MA* 52

A GaAs Monolithic 6–18 GHz Medium Power Amplifier , C. D. Palmer, P. Saunier, and R. E. Williams, <i>Texas Instruments, Inc., Dallas, TX</i>	55
A Family of Four Monolithic VCO MICs covering 2–18 GHz , B. N. Scott, M. Wurtele, and B. B. Cregger, <i>Texas Instruments, Inc., Dallas, TX</i>	58

WEDNESDAY, MAY 30

Session IV. Monolithic Millimeter-Wave Circuits

Co-Chairmen: B. E. Spielman, *NRL, Washington, D.C.*
R. W. Sudbury, MIT, Lincoln Laboratory, Lexington, MA

A 69 GHz Monolithic FET Oscillator , D. W. Maki, J. M. Schellenberg, H. Yamasaki, and L. C. T. Liu, <i>Hughes Aircraft Co., Torrance, CA</i>	62
A W-Band Monolithic GaAs Crossbar Mixer , L. T. Yuan, <i>Hughes Aircraft Co., Torrance, CA</i>	67
94 GHz Planar GaAs Monolithic Balanced Mixer , P. Bauhahn, T. Contolatis, J. Abrokwhah, C. Chao, and C. Seashore, <i>Honeywell, Bloomington, MN</i>	70
GaAs Monolithic Frequency Doublers with Series Connected Varactor Diodes , A. Chu, W. E. Courtney, L. J. Mahoney, H. A. Atwater, and R. W. McClelland, <i>MIT Lincoln Laboratory, Lexington, MA</i>	74

Session V. Monolithic Devices and Circuit Elements

Co-Chairmen: D. R. Chen, *Microwave Monolithics, Inc., Simi Valley, CA*
M. N. Yoder, ONR, Arlington, VA

Calibration Methods for Microwave Wafer Probing (Invited Paper) , E. W. Strid and K. R. Gleason, <i>Tektronix, Inc., Beaverton, OR</i>	78
Low Noise High Electron Mobility Transistors , J. Berenz, K. Nakano, and K. Weller, <i>TRW, Redondo Beach, CA</i>	83
High Efficiency GaAs MBE Power FET for Ka-Band , J. Geddes, V. Sokolov, T. Contolatis, J. Abrokwhah, and W. Larson, <i>Honeywell, Bloomington, MN</i>	87
Highly Accurate Design of Spiral Inductors for MMIC's with Small Size and High Cut-Off Frequency Characteristics , M. Parisot, Y. Archambault, D. Pavlidis, and J. Magarshack, <i>Thompson-C-S-F</i>	91
