# **THE TIME DOMAIN AND ELECTROMAGNETICS**

**Chairman: James C. Rautio—Sonnet Software**

**Session Abstract:** The solution of electromagnetic problems in the time domain, instead of the more usual frequency domain, is finding increasing interest. This session will describe recent advances in the area. Applications include the analysis of high speed digital and pulsed circuits.

**10:30 a.m.—12:00 noon, Thursday, June 15, 1989  
Pacific Room**
