

IEEE TRANSACTIONS ON

MICROWAVE THEORY AND TECHNIQUES

DECEMBER 1988

VOLUME 36

NUMBER 12

(ISSN 0018-9480)

A PUBLICATION OF THE IEEE MICROWAVE THEORY AND TECHNIQUES SOCIETY

1988 Symposium Issue

Editor's Overview	<i>H. Paczkowski</i>	1551
The 1988 MTT-S International Microwave Symposium	<i>C. Buntschuh</i>	1553
1988 MTT-S Awards	<i>C. T. Rucker</i>	1561
1988 IEEE MTT-S International Microwave Symposium Keynote Address	<i>F. A. Brand</i>	1567
Special Session in Honor of Professor Arthur A. Oliner	<i>S.-T. Peng</i>	1578
1988 MTT-S and Monolithic Circuits Symposia (Tables of Contents)		1582

MICROWAVE SYMPOSIUM PAPERS

Nonlinear GaAs MESFET Modeling Using Pulsed Gate Measurements	<i>M. Paggi, P. H. Williams, and J. M. Borrego</i>	1593
High-Performance <i>Ka</i> -Band and <i>V</i> -Band HEMT Low-Noise Amplifiers	<i>K. H. G. Duh, P.-C. Chao, P. M. Smith, L. F. Lester, B. R. Lee, J. M. Ballingall, and M.-Y. Kao</i>	1598
DC-20 GHz <i>N</i> × <i>M</i> Passive Switches	<i>M. J. Schindler, M. E. Miller, and K. M. Simon</i>	1604
Real Frequency Technique Applied to the Synthesis of Lumped Broad-Band Matching Networks with Arbitrary Nonuniform Losses for MMIC's	<i>L. Zhu, B. Wu, and C. Sheng</i>	1614
High-Yield Narrow-Band Matching Structures	<i>D. H. Monteith and J. E. Purviance</i>	1621
Integrated Model Parameter Extraction Using Large-Scale Optimization Concepts	<i>J. W. Bandler, S. H. Chen, S. Ye, and Q.-J. Zhang</i>	1629
The Transfinite Element Method for Modeling MMIC Devices	<i>Z. J. Cendes and J.-F. Lee</i>	1639
General-Purpose Harmonic Balance Analysis of Nonlinear Microwave Circuits Under Multitone Excitation	<i>V. Rizzoli, C. Cecchetti, A. Lipparini, and F. Mastri</i>	1650
A Unified Theory for Frequency-Domain Simulation and Sensitivity Analysis of Linear and Nonlinear Circuits	<i>J. W. Bandler, Q.-J. Zhang, and R. M. Biernacki</i>	1661
Monolithic Millimeter-Wave IMPATT Oscillator and Active Antenna	<i>N. Camilleri and B. Bayraktaroglu</i>	1670
A 2 GHz Surface Transverse Wave Oscillator with Low Phase Noise	<i>L. Eichinger, B. Fleischmann, P. Russer, and R. Weigel</i>	1677
<i>U</i> -Band Shield Suspended-Stripline Gunn DRO and VCO	<i>Z.-Q. Huang and Q.-R. Yang</i>	1685
Millimeter-Wave InP Lateral Transferred-Electron Oscillators	<i>S. C. Binari, R. E. Neidert, H. L. Grubin, and K. E. Meissner</i>	1695
Quasi-Optical HEMT and MESFET Self-Oscillating Mixers	<i>V. D. Hwang and T. Itoh</i>	1701
Fabrication, RF Performance, and Yield of a Combined Limiting Amplifier and Dual-Modulus Prescaler GaAs IC Chip	<i>A. E. Geissberger, R. A. Sadler, H. P. Singh, G. K. Lewis, I. J. Bahl, M. L. Balzan, E. L. Griffin, and M. J. Drinkwine</i>	1706
High-Speed QPSK Modulator and Demodulator with Subharmonic Pumping	<i>R. Trambarulo, M. V. Schneider, and M. J. Gans</i>	1714
A Broad-Band Low-Noise SIS Receiver for Submillimeter Astronomy	<i>T. H. Buttgenbach, R. E. Miller, M. J. Wengler, D. M. Watson, and T. G. Phillips</i>	1720
A Low-Loss Bandpass Filter Using Electrically Coupled High- <i>Q</i> TM ₀₁₆ Dielectric Rod Resonators	<i>Y. Kobayashi and M. Minegishi</i>	1727
Theoretical and Experimental Investigation of Novel Varactor-Tuned Switchable Microstrip Ring Resonator Circuits	<i>T. S. Martin, F. Wang, and K. Chang</i>	1733
A Circuit Model of Probes in Dual-Mode Cavities	<i>K. A. Zaki, C. Chen, and A. E. Atia</i>	1740
Multipoint Power Divider-Combiner Circuits Using Circular-Sector-Shaped Planar Components	<i>M. D. Abouzahra and K. C. Gupta</i>	1747
Slot-Coupled Directional Couplers Between Double-Sided Substrate Microstrip Lines and Their Applications	<i>T. Tanaka, K. Tsunoda, and M. Aikawa</i>	1752
A Generalized Method for Analyzing Shielded Thin Microstrip Discontinuities	<i>L. P. Dunleavy and P. B. Katehi</i>	1758

(Continued on next page)

(Continued from preceding page)

Shielding Effects in Microstrip Discontinuities	<i>L. P. Dunleavy and P. B. Katehi</i>	1767
Time-Domain Finite Difference Approach to the Calculation of the Frequency-Dependent Characteristics of Microstrip Discontinuities	<i>X. Zhang and K. K. Mei</i>	1775
Skin Effects in Narrow Copper Microstrip at 77 K	<i>U. S. Ghoshal and L. N. Smith</i>	1788
Modeling of Some Coplanar Waveguide Discontinuities	<i>R. N. Simons and G. E. Ponchak</i>	1796
Modeling Discontinuities in Dielectric-Loaded Waveguides	<i>K. A. Zaki, S.-W. Chen, and C. Chen</i>	1804
Confirmation of Slow Waves in a Crosstie Overlay Coplanar Waveguide and Its Applications to Band-Reject Gratings and Reflectors	<i>T.-H. Wang and T. Itoh</i>	1811
Finite Element Analysis of Dispersion in Waveguides with Sharp Metal Edges	<i>J. P. Webb</i>	1819
Simplified Description of the Field Distribution in Finlines and Ridge Waveguides and Its Application to the Analysis of <i>E</i> -Plane Discontinuities	<i>R. R. Mansour, R. S. K. Tong, and R. H. MacPhie</i>	1825
Computer-Aided Design of Slit-Coupled <i>H</i> -Plane T-Junction Diplexers with <i>E</i> -Plane Metal-Insert Filters	<i>J. Dittloff and F. Arndt</i>	1833
Computer-Aided Design and Improved Performance of Tunable Ferrite-Loaded <i>E</i> -Plane Integrated Circuit Filters for Millimeter-Wave Applications	<i>J. Uher, F. Arndt, and J. Bornemann</i>	1841
Slot and Microstrip Guiding Structures Using Magnetoplasmons for Nonreciprocal Millimeter-Wave Propagation	<i>C. M. Krowne, A. A. Mostafa, and K. A. Zaki</i>	1850
A Simple Coupled-Mode Analysis Method for Multiple-Core Optical Fiber and Coupled Dielectric Waveguide Structures	<i>N. Kishi and E. Yamashita</i>	1861

SHORT PAPERS

Microwave Performances of n-p-n and p-n-p AlGaAs/GaAs Heterojunction Bipolar Transistors	<i>B. Bayraktaroglu, N. Camilleri, and S. A. Lambert</i>	1869
GaAs Power MESFET Performance Sensitivity to Profile and Process Parameter Variations	<i>R. J. Trew, J. B. Yan, and D. E. Stoneking</i>	1873
De-embedding Coplanar Probes with Planar Distributed Standards	<i>D. F. Williams and T. H. Miers</i>	1876
Millimeter-Wave Components for Use in a Variable State Four-Port Network Analyzer	<i>J. V. Bellantoni, G. C. Dalman, C. A. Lee, and R. C. Compton</i>	1880
A 13 GHz YIG Film Tuned Oscillator for VSAT Applications	<i>Y. Mizunuma, Y. Murakami, H. Nakano, T. Ohgihara, and T. Okamoto</i>	1885
Full-Wave Analysis of Coupled Finline Discontinuities	<i>G. Schiavon, P. Tognolatti, and R. Sorrentino</i>	1889

PAPERS FROM THE MICROWAVE AND MILLIMETER-WAVE MONOLITHIC CIRCUITS SYMPOSIUM

FOREWORD	<i>R. S. Kagiwada</i>	1895
Uniplanar MMIC's and Their Applications	<i>M. Muraguchi, T. Hirota, A. Minakawa, K. Ohwada, and T. Sugeta</i>	1896
A <i>K/Ka</i> -Band Distributed Power Amplifier with Capacitive Drain Coupling	<i>M. J. Schindler, J. P. Wendler, M. P. Zaitlin, M. E. Miller, and J. R. Dormail</i>	1902
A 15 GHz Single-Stage GaAs Dual-Gate FET Monolithic Analog Frequency Divider with Reduced Input Threshold Power	<i>K. Kanazawa, M. Hagio, M. Kazumura, and G. Kano</i>	1908
A 9.5 GHz Commercially Available 1/4 GaAs Dynamic Prescaler	<i>M. Takahashi, H. Itoh, K. Ueda, and R. Yamamoto</i>	1913
Broad-Band Monolithic Microwave Active Inductor and Its Application to Miniaturized Wide-Band Amplifiers	<i>S. Hara, T. Tokumitsu, T. Tanaka, and M. Aikawa</i>	1920
Monolithic 60 GHz GaAs CW IMPATT Oscillators	<i>B. Bayraktaroglu</i>	1925
A Monolithic <i>Ka</i> -Band HEMT Low-Noise Amplifier	<i>C. Yuen, C. K. Nishimoto, M. W. Glenn, Y.-C. Pao, R. A. LaRue, R. Norton, M. Day, I. Zubeck, S. G. Bandy, and G. A. Zdasiuk</i>	1930
A Dual-Varactor Analog Phase Shifter Operating at 6 to 18 GHz	<i>D. M. Krafcsik, S. A. Imhoff, D. E. Dawson, and A. L. Conti</i>	1938
Millimeter-Wave Monolithic GaAs IMPATT VCO	<i>N.-L. Wang, W. Stacey, R. C. Brooks, K. Donegan, and W. E. Hoke</i>	1942
Double Balanced Mixers Using Active and Passive Techniques	<i>A. M. Pavio, R. H. Halladay, S. D. Bingham, and C. A. Sapsashe</i>	1948
High-Performance GaAs Heterojunction Bipolar Transistor Monolithic Logarithmic IF Amplifiers	<i>A. K. Oki, M. E. Kim, G. M. Gorman, and J. B. Camou</i>	1958
<i>V</i> -Band GaAs MMIC Low-Noise and Power Amplifiers	<i>H.-L. A. Hung, G. M. Hegazi, T. T. Lee, F. R. Phelleps, J. L. Singer, and H. C. Huang</i>	1966
Segmented Dual-Gate MESFET's for Variable Gain and Power Amplifiers in GaAs MMIC	<i>K. H. Snow, J. J. Komiak, and D. A. Bates</i>	1976
A 0.5 to 4 GHz True Logarithmic Amplifier Utilizing Monolithic GaAs MESFET Technology	<i>M. A. Smith</i>	1986

PATENT ABSTRACTS	<i>J. J. Daly</i>	1991
