# **DIELECTRIC RESONATOR OSCILLATORS**

**Chairman: J. F. White—J. F. White Consulting**

**Session Abstract:** This session's papers treat special topics in  $TE_{01s}$  mode dielectric resonator oscillator (DRO) technology, including injection locking, broad banding, linear tuning and low noise. In addition, mechanical tuning of coupled TEM mode, split ring resonators is presented for small size, low frequency applications.
