COVERAGE

The 1987 Index is all you need to access all of the technical publications of the IEEE, the world's leading source of information in electrical/electronics/computer science and engineering. In two volumes, the 1987 Index quickly provides you with references to all IEEE-published papers, articles, and other communications, which in 1987 totaled over 148,000 pages. Included are:

- Technical Periodicals Papers
- Conference Papers
- IEEE PRESS Books
- Technical Items from IEEE Magazines
- IEEE and ANSI/IEEE Standards
- Tutorials and Special Publications

STRUCTURE

Important information on complete publications—everything you need to fully identify and order IEEE conference records, standards etc.—is summarized in extensive listings of Indexed Publications (Volume 1). Information about individual papers is accessible by both author (Volume 1), and subject (Volume 2).

The Subject Index Headings List has been revised for 1987 to take into account the increasing use of online databases. The new set of subject headings closely parallels the controlled-vocabulary terms applied by INSPEC to all the abstracts in its database, which covers the world-wide technical literature in IEEE's subject areas. This will greatly simplify the task of finding other articles on topics that interest you.

The 1987 Index to IEEE Publications

There is simply no substitute for the aware professional requiring detailed information in electrical science and engineering.

ACCESS OVER 60,000 PERIODICAL PAGES

The 1987 Index to IEEE Publications allows you quick access to highly cited, high-impact journals covering over 45 fields of specialization, such as biomedicine... geoscience... nuclear and plasma science... pattern analysis... magnetism... computer graphics. In 1987, published materials totaled over 60,000 pages.

ACCESS OVER 85,000 NONPERIODICAL PAGES

The Index also cites all published papers presented at over 150 major IEEE-sponsored conferences held worldwide during the year—PLUS all new IEEE and ANSI/IEEE Standards, IEEE PRESS books and various other IEEE non-periodicals. In 1987, IEEE's book publishing program accounted for over 85,000 pages.

LISTS OVER 24,000 TECHNICAL ITEMS— CONTAINS OVER 200,000 ENTRIES
