

## **Session G: (Focused Session) (Joint with AP Symposium)**

### **Lightwave Technology for Microwave Antennas I and II**

**Chairman: P. R. Herczfeld**

Center for Microwave-Lightwave Engineering  
Philadelphia, PA

Sessions C and G are part of a joint MTT-AP-S focused meeting. In addition to the two listed above, these will be two sessions organized by AP-S.

The application of lightwave technology to microwave antennas is an emerging area of research with increasing interest to both organizations (MTT and APS). The sessions have a mix of invited, full length and short papers reviewing the state-of-the-art and presenting new results.

**G**

**10:00 a.m.–11:30 a.m., Tuesday, May 8, 1990  
West Ballroom D**
