

Session D

Student Papers Competition I (Special Session)

Chairman:

Peter A. Rizzi

Southeastern Massachusetts University
Elect. & Comp. Engineering Dept.
N. Dartmouth, MA

This special symposium session is devoted to the presentation of current microwave research by university students. The eight papers chosen for presentation were selected from over thirty submitted to the Technical Program Committee. Unlike other sessions, the subject matter is varied. Topics include power transistors, microstrip structures, filters, resonators, and fiber optic networks. The Student Papers Competition is continued in Session H.

A panel of judges will evaluate the papers on the basis of content, presentation, and quality of visual materials. First, second, and third place prizes will be awarded.

**10:30 a.m.–12:00 p.m., Tuesday, June 11, 1991
Room 302**
