

Session J

Advanced Techniques of Numerical Electromagnetics

Chairman:

Donald C. Power
Raytheon Company
Missile Systems Laboratories
Tewksbury, MA

Methods of numerical electromagnetics continue to make significant and rapid progress. The development of new applications for existing techniques as well as the discovery of new approaches will allow the rigorous characterization of new structures and transmission media.

**3:30 p.m.–5:00 p.m., Tuesday, June 11, 1991
Ballroom B**
