

# **Session L**

## **Microwave Radiometers (Special Session)**

**Chairman:**

**K. Tomiyasu**

General Electric Co.  
Philadelphia, PA

Since its invention in 1946, the Dicke radiometer has been continuously developed with improved components, and applied to radio astronomy and remote sensing. This session deals with the application, requirements, design, calibration, performance and significance of radiometers.

**2:30 p.m.-5:00 p.m., Tuesday, June 11, 1991  
Room 302**
