

Session T

Microwave/Optical Circuits and Applications

Chairman:

Norman R. Dietrich

AT&T Bell Laboratories
Breingsville, PA

T

New examples of merged microwave and optical technologies are reported. This continuing trend covers both circuit and subsystem applications. Low loss, wide bandwidth fiber optic subsystems for transmission or delay of microwave signals, and optical modulation and demodulation are included.

**10:30 a.m.–12:00 p.m., Wednesday, June 12, 1991
Room 302**
