

Let the IEEE bring you the conferences you can't attend...

As a professional working in the field of microwave theory and techniques technology, you know the value of the latest technical developments in your work. But as a busy professional, attending all the conferences in your field is often impossible. So let IEEE bring them to *you* through their conference proceedings publishing program. We've handpicked the proceedings below to give you up-to-the-minute coverage of key areas in the field:

IEEE 1991 International Microwave Symposium

1991 International Microwave Symposium

Cutting-edge research in microwave technology with special coverage of receiver networks, microwave ICs, electromagnetics, superconducting components, and filters.

CH2870-4

List Price \$132 IEEE member price \$66

1991 Antennas & Propagation International Symposium

1991 Antennas & Propagation International Symposium

The latest research in all aspects of the field with emphasis on scattering and diffraction, signal processing, reflector, printed circuits and microstrips, imaging, mobile and satellite communications.

CH3036-1

List Price \$154

IEEE member price \$78

Sponsored by IEEE Ant. & E Society

1991 National Radar Conference

Features the impact of microelectronics on radar systems with special coverage in four areas: radar systems and subsystems, antennas, RF analog and digital processing and phenomenology.

CH2952-0

List Price \$54

IEEE member price \$27

1991 Antennas & Propagation International Symposium

1991 Antennas & Propagation International Symposium

The latest research in all aspects of the field with emphasis on scattering and diffraction, signal processing, reflector, printed circuits and microstrips, imaging, mobile and satellite communications.

CH3036-1

List Price \$154

IEEE member price \$78
