(Focused Session)

Microwave Technology in Radio Astronomy

Co-Chairmen:

K. Tomiyasu
G.E. Co.
Philadelphia, PA

P. Napier
NRAO
Socorro, NM

During the past decades, advances in microwave, millimeter and submillimeter technology have made a profound impact on and achievements in radio astronomy. Conversely the radio astronomy community has uncovered extraordinary challenges for microwave developments for the future.

8:00 a.m.–9:10 a.m., Thursday, June 4, 1992
Brazos
