

Session P

Solid State Devices & Circuits

Chairman:

J. F. White

Applied Microwave Magazine
Lexington, MA

The papers in this session were selected to: 1) demonstrate advances in device technology in mobile communications (first two papers); 2) show fundamentals useful in control device design (third paper); and 3) show novel circuit techniques (fourth and fifth papers).

8:30 a.m.–10:00 a.m., Wednesday, June 16, 1993
Room 218/219
