

Session V

(Focused Session)

Wireless Local Area Networks

Chairman:

J. B. Horton

TRW

Redondo Beach, CA

The explosion of the wireless communications field has brought about new technologies and new applications for personal use of microwaves. This session deals with recent advances in wireless local-area-networks (LANs). Included are summary papers on developments in Japan and Australia, and three papers on specific techniques used for applications of wireless to personal communications. This session is augmented by three OPEN-FORUM papers, which include a computer LAN link demonstration, and two papers on propagation studies related to intra-building applications of LANs.

**10:30 a.m.–12:00 p.m., Wednesday, June 16, 1993
Room 205**
