

Session WW

EM Analytical and Numerical Techniques II

Chairman:

W. Hoefer

University of Victoria
Victoria, Canada

This session contains contributions based on analytical techniques which involve integral equation formulations. Even though this area of research is well established and mature, it still is a subject of intense activity, and progress is being made at a regular pace. A number of new contributions will be presented in this session.

**3:30 p.m.–5:00 p.m., Thursday, June 17, 1993
Room 215**
