

# **Session II**

## **MMIC For Personal Communications**

**Chairman:**

**R. Gold**  
Pacific Monolithics

**Co-Chairman:**

**H. Huang**  
Comsat Laboratories

This session emphasizes the MMIC's role for the personal communications. The session begins with an invited paper describing MMICs for Personal Communication Network (PCN) by A. Javed of Bell Northern Research, Canada. The invited paper is followed by two contributed papers. The first one is on GaAs JFET Front-end MMICs for L-band personal communications. The second one describes a high performance 1.5 dB noise figure LNA for 1.5-8 GHz commercial applications.

**10:40 a.m.-12:00 p.m., Monday, June 14, 1993**  
**Congress Center Room 313**
