

WE'RE ON THE WEB!

The IEEE Home Page premiered January 4, 1995 on the World-Wide Web, along with THE INSTITUTE, the IEEE monthly newspaper (and supplement to IEEE SPECTRUM). To investigate, readers will need full Internet access, plus "browser" software such as Mosaic, Lynx or Netscape.

The World-Wide Web address or URL (Uniform Resource Locator) for the IEEE Home Page is:

<http://www.ieee.org>

You can get to THE INSTITUTE Home Page by entering its World-Wide Web address:

<http://www.ieee.org/ti.html>

or by a link from the IEEE Home Page.

Readers should be aware that this is just the beginning of an exploration into cyberspace, so many of the locations in the IEEE corner of the Web are still "under construction." At present, the IEEE Home Page offers The Institute and:

MEMBER SERVICES...

a source of useful information about IEEE membership and benefits, including IEEE sectional and regional activities, Ask*IEEE, the Financial Advantage Program, and more.

IEEE BOOKSTORE...

where you can browse a selection of the IEEE's new and bestselling books, videos, merchandise and apparel, find out about continuing education, get ordering information, and more.

IEEE's TECHNICAL SOCIETIES...

gives you the inside track on society membership, new technologies, technical activities, active Society Web Pages and more—within 37 specialized fields of interest.

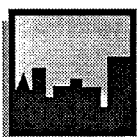

STUDENT ACTIVITIES...

a home page devoted to keeping you in touch with the many IEEE services available to students, including student membership, IEEE-related newsgroups, and the RAB Student Page. You'll also find instructions on how to register your branch Web server and an Institute-wide list of student pages.

LOCAL ACTIVITIES...

where you can find regional home pages, a list of sections and chapters, and other pointers of local interest.

FOR ORGANIZATIONS ONLY...

created expressly for librarians, book-sellers, and subscription agents, this web location provides details concerning ordering, subscriptions, and shipping.

There are also links to other related home pages and services, including THE INSTITUTE, Standards information and much more.

Keep watching the IEEE Home Page for what's new, and access/read The Institute. Try them out and send your reactions by e-mail to THE INSTITUTE reflector: institute@ieee.org.
