Session TH1E

Simulation and Design Techniques

Chairman:

R. Goyal

Mentor Graphics Corporation

Simulation and design techniques need to be improved to accommodate complex device structures, requirements for a variety of linear, non-linear and system level designs. This session covers new methods and algorithms for non-linear circuit simulation, application of microwave concepts to high speed digital design and use of a hardware description language in system design.

8:30 a.m.–10:00 a.m., Thursday, May 18, 1995
Room A4
