

# Session TH2D

## Lightwave Systems and Subsystems

**Chairman:**

**H. Sobol**

University of Texas at Arlington

TH  
2D

Significant progress has been achieved in the transport of microwave and millimeter wave signals on optical carriers. This session addresses various configurations of links for these applications. In addition, the design of an MMIC for clock recovery in high speed lightwave transmission is presented.

**10:30 a.m.-12:00 p.m., Thursday, May 18, 1995**  
**Room A3**
