|                                                                                                                             |                                                                                                                                        |     |
|-----------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------|-----|
| Total Charge Capacitor Model for Short-Channel MESFET's .....                                                               | <i>D. Webster, M. Darvishzadeh, and D. Haigh</i>                                                                                       | 351 |
| A Perturbation Procedure for Nearly Rectangular, Homogeneously Filled, Cylindrical Waveguides .....                         | <i>B. J. McCartin</i>                                                                                                                  | 354 |
| New Distributed Amplifier Design Using Transmission-Gate FET's .....                                                        | <i>Y. Imai, S. Kimura, Y. Umeda, and T. Enoki</i>                                                                                      | 357 |
| Modal Expansion of Dyadic Green's Functions of the Cylindrical Chirowaveguide .....                                         | <i>H. T. Hui and E. K. N. Yung</i>                                                                                                     | 360 |
| Waveguide-to-Coupled Fin-Line Transition in <i>Ka</i> Band .....                                                            | <i>J. de Mingo, A. Moliner, and A. Comerón</i>                                                                                         | 363 |
| A High-Efficiency 94-GHz 0.15- $\mu$ m InGaAs/InAlAs/InP Monolithic Power HEMT Amplifier .....                              | <i>R. Lai, G. I. Ng, D. C. W. Lo, T. Block, H. Wang, M. Biedenbender, D. C. Streit, P. H. Liu, R. M. Dia, E. W. Lin, and H. C. Yen</i> | 366 |
| Hybrid Boundary Contour Mode-Matching Analysis of Arbitrarily Shaped Waveguide Structures with Symmetry of Revolution ..... | <i>J. M. Reiter and F. Arndt</i>                                                                                                       | 369 |
| Miniaturized Wilkinson Power Divider Using Three-Dimensional MMIC Technology .....                                          | <i>K. Nishikawa, T. Tokumitsu, and I. Toyoda</i>                                                                                       | 372 |
| A Monolithic HEMT Passive Switch with Integrated HBT Standard Logic Compatible Driver for Phased-Array Applications .....   | <i>K. W. Kobayashi, A. K. Oki, L. B. Sjogren, D. K. Umamoto, T. R. Block, and D. C. Streit</i>                                         | 375 |
| A 75–110 GHz Automated Tuner with Exceptional Range and Repeatability .....                                                 | <i>R. Drury, R. D. Pollard, and C. M. Snowden</i>                                                                                      | 378 |
| Micromachined Coplanar Waveguides in CMOS Technology ...                                                                    | <i>V. Milanović, M. Gaitan, E. D. Bowen, M. E. Zaghloul</i>                                                                            | 380 |

The Microwave Theory and Techniques Society is an organization within the framework of the IEEE of members with principal professional interests in the field of microwave theory and techniques. All members of the IEEE are eligible for membership in the Society and will receive the LETTERS upon payment of the annual Society membership fee of \$8.00. Affiliate membership is available upon payment of the annual affiliate fee of \$35.00, plus an annual subscription fee of \$8.00. For information on joining, write to the IEEE at the address below. *Member copies of Transactions/Journals are for personal use only.*

IEEE MICROWAVE AND GUIDED WAVE LETTERS is published monthly by The Institute of Electrical and Electronics Engineers, Inc. Responsibility for the contents rests upon the authors and not upon the IEEE, the Society/Council, or its members. **IEEE Corporate Office**: 345 East 47th Street, New York, NY 10017-2394. **IEEE Operations Center**: 445 Hoes Lane, P.O. Box 1331, Piscataway, NJ 08855-1331. **NJ Telephone**: 908-981-0060. **Price/Publication Information**: Individual copies: IEEE Members \$10.00 (first copy only), nonmembers \$20.00 per copy. (Note: Add \$4.00 postage and handling charge to any order from \$1.00 to \$50.00, including prepaid orders.) Member and nonmember subscription prices available on request. Available in microfiche and microfilm. **Copyright and Reprint Permissions**: Abstracting is permitted with credit to the source. Libraries are permitted to photocopy for private use of patrons, provided the per-copy fee indicated in the code at the bottom of the first page is paid through the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923. For all other copying, reprint, or republication permission, write to Copyrights and Permissions Department, IEEE Publications Administration, 445 Hoes Lane, P.O. Box 1331, Piscataway, NJ 08855-1331. Copyright © 1996 by The Institute of Electrical and Electronics Engineers, Inc. All rights reserved. Periodicals Postage Paid at New York, NY, and at additional mailing offices. **Postmaster**: Send address changes to IEEE MICROWAVE AND GUIDED WAVE LETTERS, IEEE, 445 Hoes Lane, P.O. Box 1331, Piscataway, NJ 08855-1331. GST Registration No. 125634188. Printed in U.S.A.
