

# An issue you simply cannot miss!

## *The Proceedings of the IEEE Special Issue on Time Frequency Analysis, September 1996*

This timely, comprehensive special issue features outstanding papers and review coverage of topics at the very core of signal processing today. It is an indispensable resource for engineers and technical managers in the field.

This Special Issue is available to IEEE members for only \$10! IEEE Order No. JP501-84-091996-1-0

### ***Don't miss a moment of our 85th year!***

Subscribe to *The Proceedings of the IEEE* now and receive the *Special Issue on Time Frequency Analysis* (September 1996) FREE with your 1997 subscription.\* As an IEEE member, this archival source is yours for only \$23.00 per

### ***Featuring Papers On:***

Speech Recognition

Musical Signals

Sonar/Radar

Acoustical Scattering

Biological Applications

Skeletal Muscle and Cardiac Vibrations

Monitoring Neuronal Oscillations

Localizing Brain Activity

Postural Sway

Manufacturing and Machine Monitoring

Mechanical Signature Analysis

Scanning the Past: Sergei Schelkunoff and Antenna Theory

year—twelve issues of the most highly cited journal in electrical engineering, electronics, and computer science.

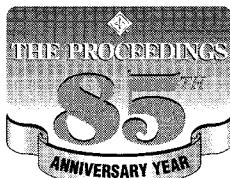

Since 1913, *The Proceedings of the IEEE* has been providing vital in-depth tutorial and review coverage of the technical developments that shape our world. Subscribe today and take part in our 85th Anniversary celebration!

- ◆ Classic papers
- ◆ Anniversary reader participation awards
- ◆ Special technical guest authors
- ◆ New and improved features
- ◆ Outstanding special issues
- ◆ Additional exciting events!

\*Offer available to new subscribers only, while supplies last.
