*Gerhard Mercator Univ. Duisburg*

TH  
2D

Considerable progress has been made in high performance photonic devices. This session includes papers reporting high speed and high power laser structures, modulators, driver circuits and low noise receivers. Applications of these devices to optical communication systems and the optical control of microwave devices is also described .

**10:20 am - 12:10 pm Thursday, June 20, 1996  
Room 134**
