

Session: WE1C

Filters I

Chair

P. Guillon

IRCOM, Univ. of Limoges

Co-Chair

Y.-C. Shih

Hughes Space and Comm., Co.

This session concerns miniaturized TEM microwave filters for high performance, low cost wireless communication systems.

Recent progress in combline and hairpin-comb filters will be given combining new geometries, new coupling structures, and new analyses. The objective of these presentations is to stimulate new trends in wireless communications filters.

8:00 am - 9:50 am Wednesday, June 19, 1996
Room 133
