

Session: WE2D

**Personal Communications
via Satellites
Technology and Trends**

Chair

R.K. Gupta

COMSAT Laboratories

WE
2D

A number of systems have been proposed for global/regional personal communications via satellite. Many of these systems have moved from system concept to development with a promise to make global personal communications services available before the year 2000. This focused session addresses the status and trends in personal communications via satellite, key features of proposed systems, technology trends related to the satellite designs, and to the user terminal equipment.

**10:20 am - 12:10 pm Wednesday, June 19, 1996
Room 134**
