

**Session: WE3C**

## **CAD Methodology**

*Chair*

***R. Goyal***

*Mentor Graphics Corp.*

*Co-Chair*

***M. Abouzahra***

*MIT Lincoln Laboratory*

Recently, microwave applications have been making strides into commercial and consumer areas. CAD methodologies are responding to the needs for designing such high volume, low cost, manufacturable products. Significant improvement are made in simulation speed by using innovative simulation and optimization techniques. There is also an emphasis on re-using the intellectual property of existing designs. Papers in this session address these innovative CAD techniques.
