

INFORMATION FOR AUTHORS

Manuscripts

IEEE TRANSACTIONS ON MICROWAVE THEORY AND TECHNIQUES is published monthly. Please submit manuscript directly to the Editor, Prof. Robert J. Trew, Department of Electrical Engineering and Applied Physics, Case Western Reserve University, 10900 Euclid Ave., Cleveland, OH 44106-7221 USA; tel: 216-368-4089; fax: 216-368-2668; e-mail: r.trew@ieee.org. Manuscripts dealing with electromagnetics, guided-wave phenomena, or numerical simulations may be submitted directly to Dr. Eikichi Yamashita, Associate Editor for Electromagnetics/Guided Waves, The University of Electro-Communications, Department of Electronic Engineering, 1-5-1 Chofugaoka, Chofu-shi, Tokyo 182 JAPAN. Manuscripts dealing with applications may be submitted to Fazal Ali, Nokia Mobile Phones, R & D Center, 9605 Scranton Road, Suite 450, San Diego, CA. 92121; tel: 619-450-4020 ext. 331; fax: 619-677-7980; e-mail: fazal.ali@nmp.nokia.com. Manuscripts dealing with special issues and invited papers may be submitted to Dr. Linda Katehi, University of Michigan, EECS Department, 3240 EECS Bldg., 1301 Beal Ave., Ann Arbor, MI 48109-2122; tel: 313-747-1796; fax: 313-747-2106; e-mail: katehi@eeecs.umich.edu. Authors must adhere to the following procedure guidelines; failure to do so will result in delays in processing the manuscript. For stylistic information please consult the publication, *Information for IEEE Transactions and Journal Authors*, available upon request from IEEE Publishing Services, 445 Hoes Lane, P.O. Box 1331, Piscataway, NJ 08854 USA. Please submit FOUR copies of the manuscript, typed double-spaced, using Courier 10 characters or equivalent, on 8 1/2 x 11 in. or A4 sheets with margins at least 1 in. (2.5 cm) all around. Accompanying figures must be submitted on separate sheets, one figure per page. Each manuscript must include an abstract of 200 words or less, the complete address, FAX number, and e-mail address (if applicable) of the corresponding author. Manuscripts of more than 40 double-spaced, typed, pages including figures will be returned without review. Submission of companion papers, especially as a means to circumvent the length restriction, is strongly discouraged. Papers are accepted as either full-length or short papers: short papers describe extensions of previous work, new experimental results, or other material of limited scope. Letters are limited to comments on previously published material, suggestions for new work, errata, and other exceptionally short articles. Technical letters are best submitted to IEEE MICROWAVE AND GUIDED WAVE LETTERS. Papers submitted to the TRANSACTIONS must not be submitted to any other journal or magazine, and papers that have been published previously in any form are not acceptable. The TRANSACTIONS will consider papers that are related to material published in symposium digests only if the paper is substantially expanded over the symposium publication. The author must notify the editor at the time of submission if the paper contains previously published material.

Figures

Clear rough-draft figures are acceptable for the initial submission: after acceptance, the author must submit camera-ready figures and tables. Note that virtually all figures will be reduced to a width of 3 inches or less, and unless care is taken in their preparation, detail will be lost. Figures should be drawn with dark lines and similarly sized, large lettering, and all axes must be labeled. Shading should be avoided. In general, plots taken from plotters using fiber-tipped pens, laboratory instruments, and dot-matrix printers are unacceptable and will be returned for revision. The final version of the paper must include a list of figure captions on a separate page.

Copyright

It is the policy of the IEEE to own the copyright to the technical contributions it publishes in the interests of the IEEE, its authors, and their employers, and to facilitate the appropriate reuse of this material by others. To comply with the U.S. Copyright Law, authors are required to sign an IEEE Copyright Form before publication. This form, a copy of which appears each January in this TRANSACTIONS, returns to the authors and their employers full rights to reuse their material for their own purpose. Authors must submit a signed copy of this form with their manuscript.

Clearance of Manuscripts

The IEEE must of necessity assume that materials presented at its meetings or submitted to its publications are properly available for general dissemination to the audiences these activities are organized to serve. It is the responsibility of the author, not the IEEE, to determine whether disclosure of their material requires the prior consent of other parties and, if so, to obtain it.

Electronic Publishing

This form of manuscript handling is recommended for the accepted paper: At the time of initial submission, the author is encouraged to submit only the hard (paper) copies. Upon final acceptance of the manuscript, the author is encouraged to submit the final version of his manuscript in electronic form on a floppy disk clearly marked with operating system and software, together with two identical paper copies. The preferred word processors include TeX, LaTeX, and Troff programs, but Word, WordPerfect, and other programs are acceptable, although the equations will be re-keyed into a TeX format at IEEE. Figures, photos, etc., must be submitted in a camera-ready form not in an electronic form. Photos should be black-and-white glossies.

Page Charges

Papers will be reviewed for their technical merit, and decisions to publish will be made independently of an author's ability to pay page charges. Page charges of \$110 (U.S.) per printed page will be rested of papers of five printed pages or less. Overlength page charges of \$200 per page are mandatory for each page in excess of five pages. If the author's organization agrees to honor the total page charge, which included the page charges on the first five pages plus the mandatory overlength charge, the author will receive 100 reprints. If the supporting organization honors only the mandatory charge, no free reprints will be sent. The editor can waive the mandatory page charges for reasons of hardship if a rest for waiver of these charges has been made in writing before the final version is submitted and if the paper has been reduced in length as suggested by the editor. Page charges for this TRANSACTIONS are not obligatory, nor is their payment a prerequisite for publication.
