## PAPERS

|                                                                                                                                                                                                  |                                                                        |     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------|-----|
| Field Analysis of Rectangular Waveguide Open Junction .....                                                                                                                                      | <i>C. T. Iatrou and M. Cavenago</i>                                    | 165 |
| Nonlinearity of Superconducting Transmission Line and Microstrip Resonator .....                                                                                                                 | <i>O. G. Vendik, I. B. Vendik, and T. B. Samoilo</i>                   | 173 |
| An Original Approach to the Design of Bandpass Cavity Filters with Multiple Couplings .....                                                                                                      | <i>G. Macchiarella</i>                                                 | 179 |
| Monolithic MESFET Distributed Baluns Based on the Distributed Amplifier Gate-Line Termination Technique .....                                                                                    | <i>A. H. Barea and I. D. Robertson</i>                                 | 188 |
| A New Approach for a Phase Controlled Self-Oscillating Mixer .....                                                                                                                               | <i>X.-S. Zhou, X. Zhang, and A. S. Daryoush</i>                        | 196 |
| Hybrid-Mode Analysis of Multilayered and Multiconductor Transmission Lines .....                                                                                                                 | <i>M. S. Alam, M. Koshiba, K. Hirayama, and Y. Hayashi</i>             | 205 |
| Optimized E-Plane Bandpass Filters with Improved Stopband Performance .....                                                                                                                      | <i>D. Budimir</i>                                                      | 212 |
| A New Approach to the Design of Dual-Mode Rectangular Waveguide Filters with Distributed Coupling .....                                                                                          | <i>P. Savi, D. Trinchero, R. Tascone, and R. Orta</i>                  | 221 |
| Microstrip Lines on Substrates with Segmented or Continuous Permittivity Profiles .....                                                                                                          | <i>J.-F. Kiang</i>                                                     | 229 |
| Calculation of Eigenmodes in a Nonperiodic Corrugated Waveguide .....                                                                                                                            | <i>I. G. Tigelis, M. Pedrozzi, P. G. Cottis, and J. L. Vomvouridis</i> | 236 |
| Nonlinear Intermodulation Coupling in Ferrite Circulator Junctions .....                                                                                                                         | <i>H. How, C. Vittoria, and R. Schmidt</i>                             | 245 |
| Analytical Solution and Frequency Extraction of Iris Problems in Waveguide by Separation of Variables .....                                                                                      | <i>T. Rozzi, A. Morini, F. Ragusini, and M. Mongiardo</i>              | 253 |
| Broad-Band Microwave Characterization of Bilayered Materials Using a Coaxial Discontinuity with Applications for Thin Conductive Films for Microelectronics and Material in Air-Tight Cell ..... | <i>N.-e. Belhadj-Tahar, O. Meyer, and A. Fourier-Lamer</i>             | 260 |
| Propagation Characteristics of a Heaviside Absorbing Layer for TLM .....                                                                                                                         | <i>I. G. Gosling and P. Qu</i>                                         | 268 |
| Hybrid-Mode Computation of Propagation and Attenuation Characteristics of Parallel Coupled Microstrips with Finite Metallization Thickness .....                                                 | <i>J.-T. Kuo and T. Itoh</i>                                           | 274 |

SHORT PAPERS

|                                                                                                                             |                                                         |     |
|-----------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------|-----|
| A Simple Evaluation of Losses in Thin Microstrips .....                                                                     | <i>G. B. Stracca</i>                                    | 281 |
| Coupling of Edge-Element and Mode-Matching for Multistep Dielectric Discontinuity in Guiding Structures .....               | <i>S. Xu and X. Sheng</i>                               | 284 |
| Quasi-Static Analysis of Shielded Microstrip Transmission Lines with Thick Electrodes .....                                 | <i>N. H. Zhu, W. Qiu, E. Y. B. Pun, and P. S. Chung</i> | 288 |
| Design of Lange-Couplers and Single-Sideband Mixers Using Micromachining Techniques .....                                   | <i>C.-Y. Chi and G. M. Rebeiz</i>                       | 291 |
| A Method for Investigating a Class of Inhomogeneous Stripline Circulators .....                                             | <i>G. Macchiarella, G. G. Gentili, and A. Lobina</i>    | 294 |
| Determination of the Roots of the Characteristic Equation for Corrugated and Dielectric Loaded Circular Waveguides .....    | <i>L. Costa da Silva</i>                                | 298 |
| Analytical Behavior of the Noise Resistance and the Noise Conductance for a Network with Parallel and Series Feedback ..... | <i>L. Boglione, R. D. Pollard, and V. Postoyalko</i>    | 301 |
| Investigating Nonlinear Propagation in Dielectric Slab Waveguides .....                                                     | <i>J.-G. Ma</i>                                         | 304 |
| A Quadrature-Hybrid Design Using a Four-Port Elliptic Patch.....                                                            | <i>K.-L. Chan, F. A. Alhargan, and S. R. Judah</i>      | 307 |

|                                                                                                                          |                                            |     |
|--------------------------------------------------------------------------------------------------------------------------|--------------------------------------------|-----|
| Comments on “High Frequency Performance of Multilayer Capacitors”.....                                                   | <i>G. Kent and M. Ingalls</i>              | 311 |
| Author’s Reply .....                                                                                                     | <i>F. J. Young</i>                         | 312 |
| Comments on “A New Reciprocity Theorem” .....                                                                            | <i>A. Lakhtakia</i>                        | 313 |
| Comments on “A New Reciprocity Theorem” .....                                                                            | <i>H. T. Anastassiou and J. L. Volakis</i> | 313 |
| Author’s Reply .....                                                                                                     | <i>J. C. Monzon</i>                        | 314 |
| Corrections to “Reconstruction of the Constitutive Parameters for an $\Omega$ Material in a Rectangular Waveguide” ..... | <i>M. Norgren and S. He</i>                | 314 |

---

CALL FOR PAPERS

|                                                                 |  |     |
|-----------------------------------------------------------------|--|-----|
| Special Issue on Microwave Circuits on Silicon Substrates ..... |  | 317 |
|-----------------------------------------------------------------|--|-----|

---
