## PAPERS

|                                                                                                                                                       |                                                       |     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------|-----|
| Wave Penetration Through Slits on Stacked Thick Plates .....                                                                                          | <i>J.-F. Kiang</i>                                    | 889 |
| Measuring the Carrier Frequency of Single Short-Duration MW Radio-Wave Pulses .....                                                                   |                                                       |     |
| ..... <i>B. D. Zaitsev, V. A. Fedorenko, A. V. Ermolenko, and N. I. Sinitsyn</i>                                                                      |                                                       | 894 |
| Monolithic Packaging Concepts for High Isolation in Circuits and Antennas .....                                                                       |                                                       |     |
| ..... <i>R. F. Drayton, R. M. Henderson, and L. P. B. Katehi</i>                                                                                      |                                                       | 900 |
| Miniature Electric Near-Field Probes for Measuring 3-D Fields in Planar Microwave Circuits .....                                                      | <i>Y. Gao and I. Wolff</i>                            | 907 |
| Analysis of an Experimental Technique for Determining Van der Pol Parameters of a Transistor Oscillator .....                                         |                                                       |     |
| ..... <i>K. Y. Chen, P. D. Biernacki, A. Lahrichi, and A. Mickelson</i>                                                                               |                                                       | 914 |
| Performance of MODFET and MESFET: A Comparative Study Including Equivalent Circuits Using Combined<br>Electromagnetic and Solid-State Simulator ..... | <i>S. M. Sohel Imtiaz and S. M. El-Ghazaly</i>        | 923 |
| An Efficient Energetic Variational Principle for Modeling One-Port Lossy Gyrotropic YIG Straight-Edge Resonators<br>.....                             | <i>I. Huynen, B. Stockbroeckx, and G. Verstraeten</i> | 932 |
| Analysis of High-Speed Interconnects in the Presence of Electromagnetic Interference .....                                                            | <i>R. Khazaka and M. Nakhla</i>                       | 940 |
| Millimeter-Wave Beams With Phase Singularities .....                                                                                                  | <i>G. F. Brand</i>                                    | 948 |
| Novel Compact Elliptic-Function Narrow-Band Bandpass Filters Using Microstrip Open-Loop Resonators With Coupled<br>and Crossing Lines .....           | <i>C.-C. Yu and K. Chang</i>                          | 952 |
| Circuit Model for Coupling Between MMIC's in Multichip Modules Including Resonance Effects .....                                                      |                                                       |     |
| ..... <i>R. W. Jackson and Z. Wang</i>                                                                                                                |                                                       | 959 |
| Analysis of Mode Coupling on Guided-Wave Structures Using Morse Critical Points .....                                                                 |                                                       |     |
| ..... <i>A. B. Yakovlev and G. W. Hanson</i>                                                                                                          |                                                       | 966 |
| Transfer Matrix Function (TMF) for Wave Propagation in Dielectric Waveguides With Arbitrary Transverse Profiles<br>.....                              | <i>Z. Menachem and E. Jerby</i>                       | 975 |
| FDTD Treatment of Partially Magnetized Ferrites With a New Permeability Tensor Model .....                                                            |                                                       |     |
| ..... <i>T. Monédière, K. Berthou-Pichavant, F. Marty, P. Gelin, and F. Jecko</i>                                                                     |                                                       | 983 |
| A Galerkin Moment Method for the Analysis of an Insulated Antenna in a Dissipative Dielectric Medium .....                                            |                                                       |     |
| ..... <i>P. E. Atlamazoglou and N. K. Uzunoglu</i>                                                                                                    |                                                       | 988 |

SHORT PAPERS

|                                                                                                                                                     |                                                                                            |      |
|-----------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------|------|
| Scattering at a Nonchiral–Chiral Interface in a Coaxial Waveguide .....                                                                             | <i>Z. Shen and R. H. MacPhie</i>                                                           | 997  |
| An Integrated Doppler-Radar Transceiver Front End Using Two FET Active Antennas .....                                                               | <i>Z. Ding and K. Chang</i>                                                                | 1001 |
| 60-GHz Monolithic Down- and Up-Converters Utilizing a Source-Injection Concept .....                                                                | <i>M. Madihian, L. Desclos, K. Maruhashi, K. Onda, and M. Kuzuhara</i>                     | 1003 |
| Physical Scaling Rules for AlGaAs/GaAs Power HBT's Based on a Small-Signal Equivalent Circuit .....                                                 | <i>U. Schaper and P. Zwicknagl</i>                                                         | 1006 |
| Calibration and Verification of the Pure-Mode Vector Network Analyzer .....                                                                         | <i>D. E. Bockelman and W. R. Eisenstadt</i>                                                | 1009 |
| Discussion on Spikes and Plateaus in Pulse Distortion Shape Along Exponential Microstrip Taper .....                                                | <i>Y. P. Yan and M. Kobayashi</i>                                                          | 1013 |
| A Sub-Nanosecond Resonant-Type Monolithic T/R Switch for Millimeter-Wave Systems Applications .....                                                 | <i>M. Madihian, L. Desclos, K. Maruhashi, K. Onda, and M. Kuzuhara</i>                     | 1016 |
| Reflection-Type Low-Phase-Shift Attenuator .....                                                                                                    | <i>W. Kang, I. Chang, and M. Kang</i>                                                      | 1019 |
| SLIM: A Slender Technique for Unbounded-Field Problems .....                                                                                        | <i>S. E. Schwarz</i>                                                                       | 1022 |
| Using Selective Asymptotics to Accelerate Dispersion Analysis of Microstrip Lines .....                                                             | <i>S. Amari, R. Vahldieck, and J. Bornemann</i>                                            | 1024 |
| On the Use of Linear-Prediction Techniques to Improve the Computational Efficiency of the FDTD Method for the Analysis of Resonant Structures ..... | <i>J. A. Pereda, J. E. Fernández del Río, F. Wysocka-Schillak, A. Prieto, and A. Vegas</i> | 1027 |

---

|                               |  |      |
|-------------------------------|--|------|
| INFORMATION FOR AUTHORS ..... |  | 1033 |
|-------------------------------|--|------|
