

TABLE OF CONTENTS

Microwave Printed Circuits -- A Historical Survey	R. M. Barrett	1
Microwave Strip Circuit Research at Tufts College	Albert D. Frost and Charles R. Mings	10
Characteristics and Some Applications of Stripline Components	W. E. Fromm	13
Photoetched Microwave Transmission Lines	Norman R. Wild	21
Characteristics and Application of Microstrip for Microwave Wiring	M. Arditi	31
Miniature Strip Transmission Line for Microwave Applications	E. N. Torgow and J. E. Griemsmann	57
Strip Type Components for 2000 Mc. Receiver Head End	K. E. Zublin	65
Properties of Dielectric Image Lines	D. D. King	75
Practical Dielectric-Filled Waveguide	Tore N. Anderson	82
Measurement of Attenuation and Phase Velocity of Various Laminate Materials at L-Band	M. E. Ringenbach and H. Warren Cooper	87
Rigorous Determination of the Parameters of Microstrip Transmission Lines	Kenneth G. Black and Thomas J. Higgins	93
The Mutual and Input Impedance of Strips Between Parallel Planes	William H. Hayt, Jr.	114
Problems in Strip Transmission Lines	Seymour B. Cohn	119
Capacity and Characteristic Impedance of Strip Transmission Lines with Rectangular Inner Conductors	N. A. Begovich	127
Equivalent Circuits for Discontinuities in Balanced Strip Transmission Line	Arthur A. Oliner	134
A Universal Approximate Formula for Characteristic Impedance of Strip Transmission Lines with Rectangular Inner Conductors	Robert L. Pease and Charles R. Mings	144
Stripline Radiators	Eugene G. Fubini	149
Slot Array Employing Photoetched Tri-Plate Transmission Lines	Donald J. Sommers	157
Band-Pass Filters Using Stripline Techniques	E. H. Bradley and D. R. White	163
Resonator and Preselector in Balanced Stripline	Max Michelson and J. F. Moore	170
A Broad-Band Microstrip Crystal Mixer with Integral D-C Return	Eric Carlson	175
