

IRE Transactions on Microwave Theory and Techniques

Published by the Professional Group on Microwave Theory and Techniques

Volume MTT-5

JANUARY, 1957

Number 1

JK

TABLE OF CONTENTS

Frontispiece.....	<i>John R. Whinnery</i>	2
Editorial.....	<i>John R. Whinnery</i>	3

CONTRIBUTIONS

Broad-Band Balanced Duplexers.....	<i>Clarence W. Jones</i>	4
Calculation of the Parameters of Ridge Waveguides.....	<i>Tsung-Shan Chen</i>	12
Excitation of Higher Order Modes in Spherical Cavities.....	<i>Rabindra N. Ghose</i>	18
Strip Line Hybrid Junction.....	<i>Herbert G. Pascalar</i>	23
Losses in Dielectric Image Lines.....	<i>D. D. King and S. P. Schlesinger</i>	31
General Synthesis of Quarter-Wave Impedance Transformers.....	<i>Henry J. Riblet</i>	36
An Analysis of the Diode Mixer Consisting of Nonlinear Capacitance and Conductance and Ohmic Spreading Resistance.....	<i>Alan C. Macpherson</i>	43
Resonance Properties of Ring Circuits.....	<i>Friedrich J. Tischer</i>	51
Frequency Stabilization of a Microwave Oscillator with an External Cavity.....	<i>Irving Goldstein</i>	57
Cooling of Microwave Crystal Mixers and Antennas.....	<i>George C. Messenger</i>	62
Measurement and Control of Microwave Frequencies by Lower Radio Frequencies.....	<i>R. C. Mackey and W. D. Hersberger</i>	64
Discontinuities in a Rectangular Waveguide Partially Filled with Dielectric.....	<i>Carlos M. Angulo</i>	68

CORRESPONDENCE

Optimum Bandwidth for Waveguide-to-Coaxial Transducers.....	<i>David S. Friedman</i>	75
Addendum to Planar Transmission Lines—I.....	<i>David Park</i>	75
Contributors.....		75
