Volume MTT-5

JULY, 1957

Number 3

### TABLE OF CONTENTS

|                                      |                              |     |
|--------------------------------------|------------------------------|-----|
| Frontispiece . . . . .               | <i>Sergei A. Schelkunoff</i> | 172 |
| Microwaves and Mathematics . . . . . | <i>Sergei A. Schelkunoff</i> | 173 |
| Well Done, Ted. . . . .              | <i>Herbert F. Engelmann</i>  | 174 |

### CONTRIBUTIONS

|                                                                                                      |                                            |     |
|------------------------------------------------------------------------------------------------------|--------------------------------------------|-----|
| A Modified Equal-Element Band-Pass Filter . . . . .                                                  | <i>R. Bawer and G. Kefalas</i>             | 175 |
| Application of Rayleigh-Ritz Method to Dielectric Steps in Waveguides . . . . .                      | <i>R. E. Collin and R. M. Vaillancourt</i> | 177 |
| Coupling Through an Aperture Containing an Anisotropic Ferrite . . . . .                             | <i>Donald C. Stinson</i>                   | 184 |
| An Adjustable Sliding Termination for Rectangular Waveguide . . . . .                                | <i>Robert W. Beatty</i>                    | 192 |
| Field Displacement Isolators at 4, 6, 11, and 24 KMC . . . . .                                       | <i>S. Weisbaum and H. Boyel</i>            | 194 |
| A Method of Producing Broad-Band Circular Polarization Employing an Anisotropic Dielectric . . . . . | <i>H. S. Kirschbaum and S. Chen</i>        | 199 |
| Errors in a Magic-Tee Phase Changer . . . . .                                                        | <i>Raymond M. Vaillancourt</i>             | 204 |
| Excess Noise in Microwave Crystal Diodes Used as Rectifiers and Harmonic Generators . . . . .        | <i>J. M. Richardson and J. J. Faris</i>    | 208 |
| Exponential Transmission Lines as Resonators and Transformers . . . . .                              | <i>Rabindra N. Ghose</i>                   | 213 |
| Correction to "Rectangular and Ridge Waveguide" . . . . .                                            | <i>Tore N. Anderson</i>                    | 217 |

### CORRESPONDENCE

|                                                                        |                        |     |
|------------------------------------------------------------------------|------------------------|-----|
| The Advantages of Expressing Standing-Wave Ratio in Decibels . . . . . | <i>David Dettinger</i> | 218 |
| Contributors . . . . .                                                 |                        | 219 |
