

TABLE OF CONTENTS

SESSION 1: Millimeter Waves – MAY 15, 1961 – 10:45 A.M. – 12 NOON

1.1 Quasi-Optical, Surface-Waveguide, and Other Components for the 100 to 300 KMC Region By F. Sobel and J. C. Wiltse	1
1.2 A Millimeter Wave Fabry-Perot Maser By W. Culshaw and R. C. Mockler	3
1.3 Broadband Isolators and Variable Attenuators for Millimeter Wavelengths By C. E. Barnes	5

SESSION 2: Parametric Devices – MAY 15, 1961 – 2:00 P.M. – 4:45 P.M.

2.1 Transmission Phase Relations of Four-Frequency Parametric Devices By Dean B. Anderson and Jerry C. Aukland	7
2.2 A Traveling Wave Parametric Amplifier By Tuck Hop Lee	9
2.3 A Novel Traveling-Wave Parametric Amplifier By Richard C. Honey	11
2.4 Practical Design and Performance of Nearly Optimum, Wideband, Degenerate Parametric Amplifiers By M. Gilden and G. L. Matthaei	13
2.5 Design Theory of Up-Converters for Use As Electronically Tunable Filters By George L. Matthaei	15
2.6 Passive Phase-Distortionless Parametric Limiters By A. E. Siegman and I. T. Ho	17

SESSION 3: Ferrites – MAY 16, 1961 – 9:00 A.M. – 12 NOON

3.1 Field Displacement Devices By Gershon J. Wheeler	19
3.2 A Field Displacement Isolator at 57 KMC By C. E. Fay and E. F. Kankowski	21
3.3 Solid State X-Band Power Limiter By W. F. Krupke, T. S. Hartwick, and M. T. Weiss	23
3.4 Frequency Doubling with Planar Ferrites and Isotropic Ferrites with Large Saturation Magnetization By Isidore Bady	25
3.5 Octave Bandwidth UHF/L Band Circulator By F. Arams, B. Kaplan, and B. Peyton	27
3.6 A New Balanced Type Ferrite Switch By T. Kuroda and A. Cho	29

SESSION 4: PANEL – High Power Microwave Techniques – MAY 16, 1961 – 2:00 P.M. – 4:45 P.M.

4.1 Spurious Outputs from High Power Microwave Tubes and Their Control By K. Tomiyasu	31
4.2 The Design and Test of High-Power Waveguide Windows By Delos B. Churchill	33
4.3 High Power Duplexers By C. E. Muehe	35

SESSION 5: PANEL – Low Noise Microwave Amplifiers – MAY 16, 1961 – 2:00 P.M. – 4:45 P.M.

5.1 Low-Noise Traveling-Wave Tubes By Dean A. Watkins	37
5.2 Parametric Amplifiers – Status 1961 By R. D. Weglein	39
5.3 Solid State Masers as Low Noise Amplifiers By H. E. D. Scovil	41

SESSION 6: Plasma – MAY 17, 1961 – 9:00 A.M. – 12 NOON

6.1 Microwave Instrumentation for Plasma Research By E. G. Schwarz and H. H. Grimm	43
6.2 Optical Dielectric Waveguides By E. Snitzer	45
6.3 Electromagnetic Properties of Weakly Ionized Argon By F. L. Tevelow and H. D. Curchack	47
6.4 The Radiation Field and Q of a Resonant Cylindrical Plasma Column By W. D. Hersberger	49
6.5 A Plasma Guide Microwave Selective Coupler By William H. Steier and I. Kaufman	51

SESSION 7: System and Receiver Noise Performance Clinic – MAY 17, 1961 – 1:30 P.M. – 4:30 P.M.

7.0 Elementary Considerations of Noise Performance By Robert Adler, Rufolf S. Engelbrecht, Hermann Haus, Matthew T. Lebenbaum, and W. W. Mumford	53
