Volume 1

Table of Contents	iii
Welcome from the 2001 Symposium Chair	vii
Dedication	ix
2001 Steering Committee	xiii
Message from the 2001 Technical Program Chairs	xxii
Technical Program Committee	xxiii
MTT-S Administrative Committee	xxix
Elected ADCOM Members	xxx
MTT-S Elected ADCOM Members and Past Presidents	xxxi
Radio Frequency Integrated Circuits (RFIC) Symposium Committees	xxxii
Automatic RF Techniques Group (ARFTG) Conference Steering and Executive Committee	xxxiii
2001 Awards	xxxv
IEEE Fellows: Class of 2001	xlvi
Future IEEE MTT-S International Microwave Symposia	xlxi
Historical Exhibit	l
2001 Microwave Symposium Technical Program Schedule	li
Technical Sessions	
TU1A Techniques for System Level Nonlinear Analysis and Simulation	3
TU1B Power Combiners/Dividers and Directional Couplers	29
TU1C Microwave Photonics	55
TU1D Frequency Converters	81
TU1E Smart Antennas	119
TU1F Biological Effects and Medical Applications	145
TU2A Plenary Session	179
TU3B Baluns, Spiral Inductors and Resonators	183
TU3C MEMS for Antenna Applications	209
TU3D Control Devices	231
TU3E Phased Array Antennas	257
TU4A (Joint IMS/RFIC Session) Low Noise Amplifiers (LNA's)	279
TU4B Innovative Structures	297
TU4C MEMS Control Circuits	319
TU4D Acoustic Devices for Wireless Communications and Sensing	349
TU4E Novel Antennas and Applications	375
TUIF (Joint RFIC—IMS Session) Interactive Forum	397
Workshops: Sunday, Monday, and Friday	III
Panel, Rump, and Special Sessions	XV
Student Paper Competition	XVIII
RFIC Program	XIX
ARFTG Conference	XXI
μAPS – Microwave Application and Products Seminar	XXII
Phoenix Information	XXIV
Guest Program	XXV
Author Index	XXXI
Exhibition Guide	XLI
Conference Hotel	LXVII
Convention Center Layouts and Area Map	LXVIII

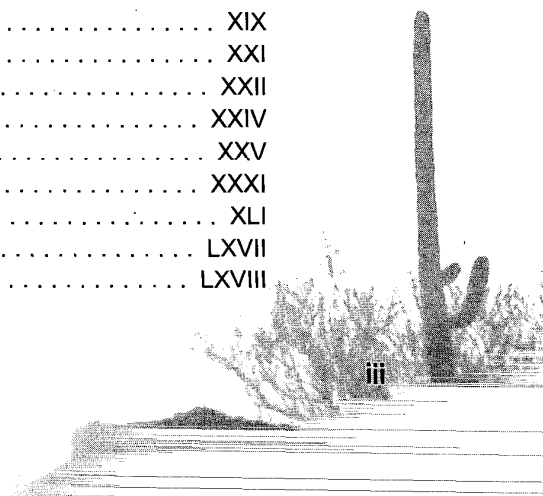

Table of Contents

Volume 2

Table of Contents	iii
2001 Microwave Symposium Technical Program Schedule	ix
Technical Sessions	
WE1A Mode Conversion between Dissimilar Transmission Media	605
WE1B High Power Amplifiers and Devices	631
WE1C Non-Linear Device Modeling	661
WE1D Frequency Control Advances for Wireless Applications	687
WE1E Dispersion Properties of Periodic Structures and Uniform Transmission Lines	713
WE1F Advances in Time Domain Methods I	739
WE2A Novel Transmission Lines, Properties, and Applications	761
WE2B Techniques to Advance Power Amplifier Linearity and Efficiency	787
WE2C Nonlinear FET Modeling	813
WE2D The NBS/NIST Centennial: One Hundred Years of RF Metrology and Standards	839
WE2E Leaky-Wave Excitation and Guidance in Printed Transmission Lines ...	861
WE2F Advances in Time-Domain Methods II	883
WE3A Power Amplifiers for Wireless Applications	909
WE3B Wideband Communication Systems	943
WE3C Nonlinear Modeling of Silicon Devices and Power Amplifiers	965
WE3D Microwave and Optical Broadband Internet Access	987
WE3E CAD with Neural Networks and EM Techniques	1005
WE3F Applications of Time Domain Methods	1027
WE4A Next Generation Power Amplifier Techniques	1053
WE4B New Technologies for Wireless Communications Systems	1083
WE4C Wireless Sensors for Automotive, RFID and Communications Systems	1105
WE4D Internet Via Satellites	1127
WE4E CAD Procedures and Optimization	1149
WE4F Ferrite and Ferroelectric Devices	1171
WEIF Interactive Forum	1199
Workshops: Sunday, Monday, and Friday	III
Panel, Rump, and Special Sessions	XV
Student Paper Competition	XVIII
RFIC Program	XIX
ARFTG Conference	XXI
μ APS – Microwave Application and Products Seminar	XXII
Phoenix Information	XXIV
Guest Program	XXV
Author Index	XXXI
Exhibition Guide	XLI
Conference Hotel	LXVII
Convention Center Layouts and Area Map	LXVIII

Table of Contents

Volume 3

Table of Contents	iii
2001 Microwave Symposium Technical Program Schedule	ix
Technical Sessions	
TH1A Microwave Signal Sources	1413
TH1B Active and Tunable Filters	1439
TH1C Passive Filters and Multiplexers 1	1465
TH1D HF/VHF/UHF Power Amplifiers	1499
TH1E Joint IMS/ARFTG Session: Probing and Automated Measurements ...	1521
TH1F Al Gross Memorial Special Session	1547
TH2A Millimeter Wave Signal Sources	1549
TH2B Active and Planar Filters	1575
TH2C Passive Filters and Multiplexers 2	1601
TH2D Millimeter Wave Multipliers and Mixers	1635
TH2E Joint IMS/ARFTG Session: Measurements of Non-linear Devices and Systems	1665
TH2F High Speed HBT Technology and Applications	1691
TH3A Multi-Layer Packaging Techniques	1717
TH3B Linear Modeling of Devices and Components	1743
TH3C Passive Filters and Multiplexers 3	1769
TH3D Millimeter Wave Transceiver Elements and Assemblies	1803
TH3E Spatial Combining and Active Antennas	1825
TH3F High Performance MMIC Technologies	1863
TH4A Packaging Interconnect Techniques	1889
TH4B Frequency Domain EM Techniques	1923
TH4C Low Noise Components and Techniques	1953
TH4D Microwave Applications of Superconductivity	1975
THIF Interactive Forum	1997
Workshops: Sunday, Monday, and Friday	III
Panel, Rump, and Special Sessions	XV
Student Paper Competition	XVIII
RFIC Program	XIX
ARFTG Conference	XXI
μAPS – Microwave Application and Products Seminar	XXII
Phoenix Information	XXIV
Guest Program	XXV
Author Index	XXXI
Exhibition Guide	XLI
Conference Hotel	LXVII
Convention Center Layouts and Area Map	LXVIII
