Table of Contents	iii
Welcome from the 2003 Symposium Chair and Co-Chair	vii
2003 Steering Committee	xi
Message from the 2003 Technical Program Chair and Co-Chair	xxi
Technical Program Committee	xxii
MTT-S Administrative Committee	xxxviii
MTT-S ADCOM Past Presidents	xl
ADCOM Honorary Life Members and Editors	xlvi
ADCOM Past Presidents 1952-2002	xlvi
Radio Frequency Integrated Circuits (RFIC) Symposium Committees	xliv
Automatic RF Techniques Group (ARFTG) Conference Steering Committee	xliv
2003 Awards	li
IEEE Fellows: Class of 2003	lxii
Future IEEE MTT-S International Microwave Symposia	lxvii
Historical Exhibit	lxviii
2003 Microwave Symposium Technical Program Schedule	lxxi
Technical Sessions	
TU1A: Plenary Session	3
TU1B: Novel Modeling Techniques for Microwave CAD	7
TU2B: Passive Components	29
TU3B: High Power Amplifiers	67
TU4B: Frequency Conversion and Control	85
TU5B: Millimeter Wave Monolithic IC Technologies	111
TU6B: Microwave Photonic Devices	141
TU1C: Microwave CAD Exploring Neural Networks and Fuzzy Logic	163
TU2C: Focused Session – Negative Refractive Index Materials and Applications	185
TU3C: Advances in High Power Transistor Technology	207
TU4C: Amplifiers and Control Circuits	233
TU5C: Microwave Photonic Systems	259
TU1D: Frequency-Domain CAD Techniques	285
TU2D: Negative Index Materials and Microwave Applications	307
TU3D: High Power Amplifier Linearization	333
TU4D: Focused Session (Joint with RFIC)—	
Ultra-Wideband Communications & Radar: Entering the Marketplace	355
TU5D: Biological Effects and Medical Applications	377
TU6D: Ferrite and Control Devices	411
TUIF: Joint Interactive Forum (IMS Papers)	441
Joint Interactive Forum (RFIC Papers)	A1
Tutorials/Workshops: Sunday, Monday, and Friday	III
Panel and Special Sessions	XX
Student Paper Competition	XXI
RFIC Program	XXII
μAPS – Microwave Application and Products Seminar	XXV
ARFTG Conference	XXVII
Philadelphia Information	XXVIII
Guest Program	XXX
Author Index	XXXV
Exhibition Guide	VLII
Convention Center Layouts and Area Map	LXXVII
Conference Hotel	LXXX

Volume 2

Table of Contents	iii
2003 Microwave Symposium Technical Program Schedule	ix
Technical Sessions	
WE1A: Non-Linear Device Modeling	633
WE2A: Leakage Effects on Planar Structures	659
WE3A: Power Amplifiers and Devices for Wireless Applications	685
WE4A: Advances in Microwave Oscillators	715
WE5A: Focused Session --Terahertz Technology	737
WE1B: Non-Linear Device and System Simulation Techniques	767
WE2B: Behavioral Modeling for Nonlinear Microwave Components	785
WE3B: Guided Wave Structures and New Effects	807
WE4B: Power Amplifiers for C to Q Band Application	841
WE5B: Millimeter Wave Signal Sources	875
WE6B: Millimeter Wave Generation and Amplification	897
WE1C: Cavity Filters and Multiplexers	927
WE2C: Si Transmission Lines	957
WE3C: Time-Domain Methods and Applications	975
WE4C: Linear Modeling and Passive Devices	997
WE5C: System Level Packaging	1027
WE6C: Focused Session — Software Radio	1049
WE1D: Planar Technologies for Filters and Multiplexers	1071
WE2D: Novel Waveguide Structures, Discontinuities and Transitions	1097
WE3D: Advances in Time-Domain Techniques	1119
WE4D: Enabling Packaging Technologies	1145
WE5D: ICs for Optical Communication at 40 Gb/s & Beyond	1171
WEIF: Interactive Forum	1197
Tutorials/Workshops: Sunday, Monday, and Friday	III
Panel and Special Sessions	XX
Student Paper Competition	XXI
RFIC Program	XXII
μAPS – Microwave Application and Products Seminar	XXV
ARFTG Conference	XXVII
Philadelphia Information	XXVIII
Guest Program	XXX
Author Index	XXXV
Exhibition Guide	VLII
Convention Center Layouts and Area Map	LXXVII
Conference Hotel	LXXX

Volume 3

Table of Contents	iii
2003 Microwave Symposium Technical Program Schedule	ix
Technical Sessions	
TH1A: Microwave Filter Synthesis Techniques	1453
TH2A: RF-MEMS Phase Shifters and Micromachined Inductors	1475
TH3A: Focused Session – High Speed Sampling Circuits and Techniques	1501
TH4A: Advanced Array Techniques	1523
TH5A: Advances in Semiconductor Technology for Wireless Systems	1545
TH6A: Low Noise Components Based on Si, GaAs, and InP Technologies	1567
TH1B: Planar and Periodic Filters	1593
TH2B: Focused Session - Future Material Technologies for RF-MEMS	1623
TH3B: Time Domain and Nonlinear Measurement Techniques	1641
TH4B: Advances in Beamsteering and Beamforming Arrays	1667
TH5B: Techniques for Enhancing Wireless System Performance	1693
TH6B: RF Power Amplifiers and Techniques	1715
TH1C: Active and Tunable Filters	1745
TH2C: MEMS Techniques for Tunable Filters and Resonators	1779
TH3C: Microwave Measurement Techniques	1805
TH4C: Beam Steering, Metamaterials and Smart Antenna Characterization	1831
TH5C: Spatial Power Combining	1857
TH1D: Superconducting and Novel Planar Filters	1879
TH2D: Modeling and Packaging of MEMS Components	1913
TH3D: Microwave and Millimeter-Wave Sensor Applications	1939
TH4D: Frequency Domain Techniques	1957
TH5D: Ferroelectrics and Acoustic Devices	1987
TH6D: Advanced Millimeter-Wave Transceiver and Source Technology	2013
THIF: Interactive Forum	2039
Tutorials/Workshops: Sunday, Monday, and Friday	III
Panel and Special Sessions	XX
Student Paper Competition	XXI
RFIC Program	XXII
μAPS – Microwave Application and Products Seminar	XXV
ARFTG Conference	XXVII
Philadelphia Information	XXVIII
Guest Program	XXX
