LETTERS

Wide-Band VCOs in SiGe Production Technology Operating Up to About 70 GHz	
..... <i>H. Li, H.-M. Rein, R.-E. Makon, and M. Schwerd</i>	425
Multifunctional Substrates for High-Frequency Applications	<i>X. Gong, W. J. Chappell, and L. P. B. Katehi</i> 428
Very High Density RF MIM Capacitors ($17 \text{ fF}/\mu\text{m}^2$) Using High- κ Al_2O_3 Doped Ta_2O_5 Dielectrics	
..... <i>M. Y. Yang, C. H. Huang, A. Chin, C. Zhu, B. J. Cho, M. F. Li, and D.-L. Kwong</i>	431
2.4 GHz Continuously Variable Ferroelectric Phase Shifters Using All-Pass Networks	
..... <i>D. Kim, Y. Choi, M. Ahn, M. G. Allen, J. S. Kenney, and P. Marry</i>	434
A MEMS Reconfigurable Matching Network for a Class AB Amplifier	
..... <i>Y. Lu, D. Peroulis, S. Mohammadi, and L. P. B. Katehi</i>	437
Parallel-Coupled Microstrip Filters With Over-Coupled End Stages for Suppression of Spurious Responses.	
..... <i>J.-T. Kuo, S.-P. Chen, and M. Jiang</i>	440
A Dual-Band (13/22-GHz) VCO Based on Resonant Mode Switching.	<i>D. Baek, J. Kim, and S. Hong</i> 443
8-GHz CMOS Quadrature VCO Using Transformer-Based LC Tank	<i>D. Baek, T. Song, E. Yoon, and S. Hong</i> 446
A New Empirical Nonlinear Model for Sub-250 nm Channel MOSFET	
..... <i>A. Siligaris, G. Dambrine, D. Schreurs, and F. Danneville</i>	449
Multi-Order Predistortion of Power Amplifiers Using a Second Harmonic Based Technique	
..... <i>K.-J. Cho, D.-H. Jang, S.-H. Kim, J.-H. Kim, B. Lee, N.-Y. Kim, J.-C. Lee, and S. P. Stapleton</i>	452
