PAPERS

- Extrapolation Methods for Sommerfeld Integral Tails (*Invited Review Paper*) K. A. Michalski 1405
- A Complete Electromagnetic Simulation of the Separated-Aperture Sensor for Detecting Buried Land Mines J. M. Bourgeois and G. S. Smith 1419
- New Equations for Electromagnetic Scattering by Small Perturbations of a Perfectly Conducting Surface D. Holliday, L. L. DeRaad, Jr., and G. J. St-Cyr 1427
- The Analysis of General Axially Symmetric Antennas with a Coaxial Feed Line by the Method of Lines R. Pregla 1433
- Scattering and Radiation from a Slitted Parallel-Plate with Rectangular Grooves: TE-Wave J. H. Lee and H. J. Eom 1444
- RF Characterization of an Inflatable Parabolic Torus Reflector Antenna for Space-Borne Applications R. A. Hoferer and Y. Rahmat-Samii 1449
- Incremental Length Diffraction Coefficients for the Shadow Boundary of a Convex Cylinder T. B. Hansen and R. A. Shore 1458
- A Fast Full-Wave Analysis of Scattering and Radiation from Large Finite Arrays of Microstrip Antennas C.-F. Wang, F. Ling, and J.-M. Jin 1467
- The Concurrent Complementary Operators Method for FDTD Mesh Truncation O. M. Ramahi 1475
- Complex Image Model for Ground-Penetrating Radar Antennas C. J. Leat, N. V. Shuley, and G. F. Stickley 1483
- Integrated Modified Rectangular Loop Slot Antenna on Substrate Lenses for Millimeter- and Submillimeter-Wave Frequencies Mixer Applications P. Otero, G. V. Eleftheriades, and J. R. Mosig 1489
- Plane Wave Scattering and Absorption by Resistive-Strip and Dielectric-Strip Periodic Gratings T. L. Zinenko, A. I. Nosich, and Y. Okuno 1498
- Model-Based Prediction of Amplitude Scintillation Variance Due to Clear-Air Tropospheric Turbulence on Earth-Satellite Microwave Links F. S. Marzano and G. d'Auria 1506
- A Fictitious Domain Method for Conformal Modeling of the Perfect Electric Conductors in the FDTD Method F. Collino, S. Garcés, and P. Joly 1519
- A Back-to-Back Rectangular-Patch Antenna Fed by a CPW H. Iwasaki 1527
- Bistatic Model of Ocean Scattering G. Picardi, R. Seu, S. G. Sorge, and M. M. Neira 1531
- Radiation Characteristics of an Infinite Dielectric-Coated Axially Slotted Cylindrical Antenna Partly Embedded in a Ground Plane H. A. Ragheb and U. M. Johar 1542
- Resistive and Conductive Tube Boundary Condition Models for Material Wire-Shaped Scatterers K. W. Whites 1548
- UTD Analysis of a Shaped Subreflector in a Dual Offset-Reflector Antenna System K. Lim, H. Ryu, S. Lee, and J. Choi 1555
- Direct Singular Integral Equation Methods in Scattering and Propagation in Strip- or Slot-Loaded Structures J. L. Tsalamengas 1560
- Plane Wave Scattering by Slots on a Ground Plane Loaded with Semicircular Dielectric Cylinders in Case of Oblique Incidence and Arbitrary Polarization I. O. Vardiambasis, J. L. Tsalamengas, and J. G. Fikioris 1571

LETTERS

- Extracting Scintillations from Satellite Beacon Propagation Data I. E. Otung, M. O. Al-Nuaimi, and B. G. Evans 1580
- Efficient Calculation of the Green's Function for Multilayered Planar Periodic Structures M.-J. Park and S. Nam 1582
- Generalized Decomposition of Electromagnetic Fields in Bi-anisotropic Media I. V. Lindell and F. Olyslager 1584
- Coupling Mechanism of Two Dipoles Within a Conductor-Backed Thin Dielectric Slab Above the Earth D. K. Park and J. W. Ra 1586
- Microstripline-Fed Cylindrical Slot Antennas W. Y. Tam 1587
- Scattering Properties of Circular Cylinders with Periodical Corrugations in the Azimuthal Direction J.-F. Kiang 1589
