

ANTENNAS AND PROPAGATION

A PUBLICATION OF THE IEEE ANTENNAS AND PROPAGATION SOCIETY

JANUARY 1999

VOLUME 47

NUMBER 1

IETPAK

(ISSN 0018-926X)

OBITUARY

- James R. Wait—Electromagnetic Scientist and Educator *D. G. Dudley, E. P. Krider, and B. K. Sternberg* 1

PAPERS

- A Curved Spiral Antenna Above a Conducting Cylinder *H. Nakano and K. Nakayama* 3
- A Finite-Difference Time-Domain Method for Solving Electromagnetic Problems with Bandpass-Limited Sources ... *J. D. Pursel and P. M. Goggans* 9
- Radiation Characteristics of Dielectric-Coated Coaxial Waveguide Periodic Slot with Finite and Zero Thickness *C.-W. Lee and H. Son* 16
- Patch Antennas on Ferromagnetic Substrates *A. D. Brown, J. L. Volakis, L. C. Kempel, and Y. Y. Botros* 26
- Scattering from Complex Bodies Using a Combined Direct and Iterative Technique *A. Sullivan and L. Carin* 33
- Implementing Adaptive Power Control as a 30/20-GHz Fade Countermeasure *D. G. Sweeney and C. W. Bostian* 40
- TM Electromagnetic Scattering by a Transparent Wedge with Resistive Faces ... *C. Demeterscu, B. V. Budaev, C. C. Constantinou, and M. J. Mehler* 47
- Prediction and Measurement of Wall Insertion Loss *T. B. Gibson and D. C. Jenn* 55
- Study of a CPW Inductively Coupled Slot Antenna *S. Sierra-Garcia and J.-J. Laurin* 58
- Efficient Wide-Band Evaluation of Mobile Communications Antennas Using $[Z]$ or $[Y]$ Matrix Interpolation with the Method of Moments *K. L. Virga and Y. Rahmat-Samii* 65
- Frequency Dependence of Amplitude Scintillation *M. M. J. L. van de Kamp, C. Riva, J. K. Tervonen, and E. T. Salonen* 77
- Diffraction of Radio Waves from Arbitrary One-Dimensional Surface Impedance Discontinuities *K. Sarabandi and M. D. Casciato* 86
- On a New Cylindrical Harmonic Representation for Spherical Waves *D. H. Werner and T. W. Colegrove* 97
- Asymptotic Analysis of the Natural System Modes of Coupled Bodies in the Large-Separation Low-Frequency Regime *G. W. Hanson and C. E. Baum* 101
- Development and Application of a Novel Class of Hierarchical Tangential Vector Finite Elements for Electromagnetics *L. S. Andersen and J. L. Volakis* 112
- Experimental Observation and Statistics of Multipath from Terrain with Application to Overland Height Finding *L. M. Zurk* 121
- A Pseudospectral Method for Time-Domain Computation of Electromagnetic Scattering by Bodies of Revolution *B. Yang and J. S. Hesthaven* 132
- Effective Medium Theories for Artificial Materials Composed of Multiple Sizes of Spherical Inclusions in a Host Continuum *W. M. Merrill, R. E. Diaz, M. M. LoRe, M. C. Squires, and N. G. Alexopoulos* 142
- A Functional for Dynamic Finite-Element Solutions in Electromagnetics *C. F. Bunting and W. A. Davis* 149
- Worldwide Techniques for Predicting the Multipath Fading Distribution on Terrestrial LOS Links: Background and Results of Tests *R. L. Olsen and T. Tjelta* 157
- Periodically Slotted Dielectrically Filled Parallel-Plate Waveguide as a Leaky-Wave Antenna: E -Polarization Case *C.-W. Lee and H. Son* 171
- Mode-Matching Analysis of Top-Hat Monopole Antennas Loaded with Radially Layered Dielectric *L. A. Francavilla, J. S. McLean, H. D. Foltz, and G. E. Crook* 179
- Efficient Eigenspace-Based Array Signal Processing Using Multiple Shift-Invariant Subarrays *S.-J. Yu and J.-H. Lee* 186
- Green's Function for an Unbounded Biaxial Medium in Cylindrical Coordinates *P. G. Cottis, C. N. Vazouras, and C. Spyrou* 195
- Analysis of the Interference Due to Differential Rain Attenuation Induced by an Adjacent Path on a Triple-Site Diversity Earth-Space System *J. D. Kanellopoulos and S. N. Livieratos* 200

LETTERS

- A Full-Wave Radiation Model for a Class of Gridded Ground Interconnecting Structures *R. Cicchetti and A. Faraone* 212
- Evaluation of the Optimum Tilt Angles for Elevation-Scanned Phased-Array Radars *M. J. Lee, I. Song, S. C. Kim, and H.-M. Kim* 214
- Auto-Regressive Filter-Based E-Pulse Discriminating Scheme *S. L. Primak, J. LoVetri, Z. Damjanschitz, and S. Kashyap* 216
