

ANTENNAS AND PROPAGATION

A PUBLICATION OF THE IEEE ANTENNAS AND PROPAGATION SOCIETY

APRIL 1999

VOLUME 47

NUMBER 4

IETPAK

(ISSN 0018-926X)

PAPERS

Stability of Absorbing Boundary Conditions	O. M. Ramahi	593
On the Use of Finite Surfaces in the Numerical Prediction of Rough Surface Scattering	R. T. Marchand and G. S. Brown	600
Cross-Slot-Coupled Microstrip Antenna and Dielectric Resonator Antenna for Circular Polarization	C.-Y. Huang, J.-Y. Wu, and K.-L. Wong	605
Wide-Band Electromagnetic Scattering from a Dielectric BOR Buried in a Layered Lossy Dispersive Medium	N. Geng and L. Carin	610
A Novel Efficient Algorithm for Scattering from a Complex BOR Using Mixed Finite Elements and Cylindrical PML	A. D. Greenwood and J.-M. Jin	620
Analysis of Truncated Periodic Array Using Two-Stage Wavelet-Packet Transformations for Impedance Matrix Compression	Y. Shifman, Z. Baharav, and Y. Leviatan	630
Interference Suppression via Operating Frequency Selection	R. M. Davis, R. L. Fante, T. P. Guella, and R. J. Balla	637
Scattering from Several Test-Objects Computed by 3-D Hybrid IE/PDE Methods	P. Soudais, H. Stève, and F. Dubois	646
Dual-Frequency and Broad-Band Antennas with Stacked Quarter Wavelength Elements	L. Zaid, G. Kossiavas, J. Y. Dauvignac, J. Cazajous, and A. Papiernik	654
FDTD Analysis of Phased Array Antennas	G. M. Turner and C. Christodoulou	661
Numerical Optimization of a Cylindrical Reflector-in-Radome Antenna System	V. B. Yurchenko, A. Altıntaş, and A. I. Nosich	668
Fast Solution of Electromagnetic Integral Equations Using Adaptive Wavelet Packet Transform	H. Deng and H. Ling	674
Numerical Solution of 2-D Scattering Problems Using High-Order Methods	L. R. Hamilton, J. J. Ottusch, M. A. Stalzer, R. S. Turley, J. L. Vishner, and S. M. Wandzura	683
Measurement and Prediction of Helix-Loaded Chiral Composites	C. R. Brewitt-Taylor, P. G. Lederer, F. C. Smith, and S. Haq	692
Analysis for a Dielectrically Filled Parallel-Plate Waveguide with Finite Number of Periodic Slots in its Upper Wall as a Leaky Wave Antenna	J.-I. Lee, U.-H. Cho, and Y.-K. Cho	701
The Analysis of Medium-Sized Arrays of Complex Elements Using a Combination of FDTD and Reaction Matching	C. J. Railton and G. S. Hilton	707
Angle Measurement with a Phase Monopulse Radar Altimeter	J. R. Jensen	715
Use of Computationally Efficient Method of Moments in the Optimization of Printed Antennas	L. Alatan, M. I. Aksun, K. Leblebicioğlu, and M. T. Birand	725
Design and Analysis of a 2-D Eigenspace-Based Interference Canceller	C.-C. Lee and J.-H. Lee	733
A Technique for Extrapolating Numerically Rigorous Solutions of Electromagnetic Scattering Problems to Higher Frequencies and their Scaling Properties	Z. Altman and R. Mittra	744
Monte Carlo Simulations of Wave Scattering from Lossy Dielectric Random Rough Surfaces Using the Physics-Based Two-Grid Method and the Canonical-Grid Method	Q. Li, C. H. Chan, and L. Tsang	752

LETTERS

Closed-Form Solution for a Line Source at the Edge of an Isorefractive Wedge	V. G. Daniele and P. L. E. Uslenghi	764
An Iterative Solution of One-Dimensional Rough Surface Scattering Problems Based on a Factorization of the Helmholtz Operator	R. J. Adams and G. S. Brown	765
Optimal Polarizations and Application to Meteorological Targets	V. Santalla, G. C. McCormick, and Y. M. M. Antar	767

COMMENTS

Comment on "Radiation of an Aperture Antenna Covered by a Spherical-Shell Chiral Radome and Fed by a Circular Waveguide"	A. Lakhtakia	770
