

CONTENTS

Vortices behind a bluff body with an upswept aft section in ground effect X. Zhang, A. Senior and A. Ruhrmann	1
Filter-based unsteady RANS computations S.T. Johansen, J. Wu and W. Shyy	10
Numerical studies of heat transfer enhancements in laminar separated flows Y.M. Chung and P.G. Tucker	22
Simulations of laminar and transitional cold wall jets P. Bhattacharjee and E. Loth	32
Interfacial structures in confined cap-turbulent and churn-turbulent flows X. Sun, S. Kim, L. Cheng, M. Ishii and S.G. Beus	44
Vertically upward two-phase flow with a highly viscous liquid-phase in a nozzle and orifice plate D.A. McNeil and A.D. Stuart	58
Prediction of dynamic contact angle histories of a bubble growing at a wall C.W.M. van der Geld	74
Boiling hysteresis of impinging circular submerged jets with highly wetting liquids D.W. Zhou, C.F. Ma and J. Yu	81
Dynamic surface tension measurements of molten Sn/Pb solder using oscillating slender elliptical jets E.A. Howell, C.M. Megaridis and M. McNallan	91
Turbulent natural convection in an air filled partitioned square cavity F. Ampofo	103
Mathematical model and simulation of gas flow through a porous medium in high breaking capacity fuses D. Rochette and S. Clain	115
